*4th Refinement Workshop* 2013-03-14 this report focuses upon the home office s identity cards scheme which uses various technologies including biometrics information and communication technology ict and smart cards it explores the ways in which scientific advice risk and evidence are being managed in relation to technologies that are continually developing the home office has followed good practice by the establishment of advisory

committees the use of office of government commerce ogc gateway reviews and the development of risk management strategies along with a policy of gradual implementation but the committee has identified weaknesses in the use of scientific advice and evidence there has been a lack of transparency surrounding the incorporation of scientific advice the procurement process and the ict system consultations have been limited in scope and their objectives have been unclear only some aspects of the scheme such as the biometrics have been determined the home office s decisions demonstrate an inconsistent approach to scientific evidence and the committee is concerned that choices regarding biometric technology have preceded trials with extensive trialling still to take place the committee is sceptical about the validity of projected costs the committee recommends that the home office seeks advice on ict from senior and experienced professionals and establishes an ict assurance committee it is crucial that the home office increases clarity and transparency across the programme not only in problem areas the programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions
