provides detailed information on Castle Amber. This is the first guide to the works of this well-known SF writer when Roger Zelazny exploded on the science fiction in 1962. It was not with a whimper but a bang; the fallout was a shower of simile, symbol, and allusion images fresh and new, burst in fields of variegated color, rich tapestries full of mythic characters and beasts, unfolded in poetic escapes from reality and always with great style. Yoke, a close friend of Zelazny's since they shared a desk in the first grade, here delineates the author's work from his very first explorations of fantasy through such classics as *Lord of Light*, *Home is the Hangman*, and the magisterial Amber series. Step by step, guide to creating compelling, memorable presentations. A chart that once took ten hours to prepare can now be produced by anyone with ten minutes and a computer keyboard. What hasn't changed, however, are the basics behind creating a powerful visual: what to say, why to say it, and how to say it for the most impact. In *Say It with Charts*, fourth edition, the latest cutting-edge edition of his best-selling presentation guide, Gene Zelazny reveals time-tested tips for preparing effective presentations. Then this presentation guru shows you how to combine those tips with today's hottest technologies for sharper, stronger visuals. Look to this comprehensive presentation encyclopedia for information on how to prepare different types of charts: pie, bar, column, line, or dot, and when to use each. Lettering, size, color choice, appropriate chart types, and more techniques for producing dramatic visuals using animation, scanned images, sound, video, and links to pertinent websites.

From the far reaches of space to the hidden corners of earth, from aliens to wizards and everything in between, one of the most influential SF writers of modern times, Roger Zelazny, wrote across a wide range of subgenres and themes, experimenting with form and story with mastery. He won many awards throughout his lifetime, including six Hugo Awards, three Nebula Awards, and two Locus Awards. He has inspired many of today's great SF authors. This new collection contains a selection of his short stories and novellas which span the depth and breadth of the human imagination. Zelazny has always had one of the most inventive imaginations in the genre. Kirkus Reviews paragon of the storytelling art, Robert Silverberg, Zelazny's authority never falters, and nor does the charisma of his voice. Locus challenging convention with the SF nonconformist, Roger Zelazny combined poetic prose with fearless literary ambition to become one of the most influential science fiction writers of the 1960s. Yet many critics found his later novels underachieving, and his turn to fantasy a disappointment. F. Brett Cox surveys the landscape of Zelazny's creative life and contradictions. Launched by the classic 1963 short story *A Rose for Ecclesiastes*, Zelazny soon won the Hugo Award for best novel with *Call Me Conrad*, and two years later won again for *Lord of Light*. Cox looks at the author's overnight success and follows Zelazny into a period of continued formal experimentation, the commercial triumph of the Amber sword and sorcery novels, and renewed acclaim for Hugo-winning novellas such as *Home is the Hangman* and *24 Views of Mt. Fuji* by Hokusai. Throughout, Cox analyzes aspects of Zelazny's art from his preference for poetically alienated protagonists to the ways his plots reflected his determined individualism. Clear-eyed and detailed, Roger Zelazny provides an up-to-date reconsideration of an often misunderstood SF maverick. Portrays the career, beliefs, and writings of this science fiction author known for his optimistic views of the future. In the mid-1980s, Easton Press began publishing a series of leather-bound collector editions called *Masterpieces of Science Fiction* and *Masterpieces of Fantasy*, which featured some of the most important works in these genres. James Gunn was commissioned to write introductions to these works, which allowed him to pay tribute to many authors who inspired and influenced his own work. In *Paratexts: Introductions to Science Fiction and Fantasy*, Gunn has collected the most significant essays produced for the Easton series, along with prefaces he wrote for reprints of his own novels. Cited here are some of the most significant works of 19th and 20th century science fiction and fantasy, such as *The Island of Dr. Moreau* (1984), *Stranger in a Strange Land*, *A Clockwork Orange*, *Speaker for the Dead*, *The Postman*, *Do Androids Dream of Electric Sheep?*, *The Hitchhiker's Guide to the Universe*, *The Dead Zone*, *The Mists of Avalon*, *Dragon's Eye*, *Nine Princes in Amber*, *Blue Mars*, *The Last Unicorn*, and *The Lord of the Rings*. Drawing upon Gunn's lifetime of work in the field, these introductions include analyses of the individual works and the fields in which they were written. Gunn also briefly discusses each novel's significance in the science fiction canon. Collected here for the first time, these prefaces and introductions provide readers with insight into more than seventy novels, making *Paratexts* a must-read for science fiction and fantasy aficionados. *Presents articles on the horror and fantasy genres of fiction, including authors, themes, significant works, and awards.* The *Historical Dictionary of Science Fiction in Literature* is a useful reference to the broad and burgeoning field of science fiction literature. Science fiction literature has gained immensely in critical respect and attention while maintaining a broad readership. However, despite the fact that it is a rapidly changing field, contemporary science fiction literature also maintains a strong sense of its connections to science fiction of the past, which makes a historical reference of this sort particularly valuable as a tool for understanding science fiction literature as it now exists and as it has evolved over the years. The *Historical Dictionary of Science Fiction in Literature* covers the history of science fiction in literature through a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries, including significant people, themes, critical issues, and the most significant genres that have formed science fiction literature. This book is an excellent access point for students, researchers, and anyone wanting to know

published in 1999 the ten essays in this collection identify and examine reworkings of identifiable source texts from the medieval or renaissance periods the reasons for the modern adaptations depend variously on an individual author s personal perspectives the worldview of his or her society and the individual s place in it the various chapters therefore address issues such as why a particular model was chosen and how its retelling depends on the modern author auteur s misreading or rereading of medieval chivalric conventions this book compliments numerous existing studies of medievalism in the enlightenment and victorian eras by examining more recent adaptations of the much studied arthurian romances but primarily extends the discussion on the nature of revivals to other medieval or renaissance chivalric texts especially the carolingian cycle epic the collection includes not only literary retellings of medieval texts but also some in different media such as theatre and cinema
