educators seeking ways to update their presentation skills will find the keys to enriching their workshops with movement laughter and learning that lasts this book explores the multifaceted aspects of sculptor s workshops from the renaissance to the early nineteenth century contributors take a fresh look at the sculptor s workshop as both a physical and discursive space by studying some of the most prominent artists sculptural practices the workshop appears as a multifaceted sociable and practical space the book creates a narrative in which the sculptural workshop appears as a working laboratory where new measuring techniques new materials and new instruments were tested and became part of the lived experience of the artist and central to the works coming into being artists covered include donatello roubilliac thorvaldsen canova and christian daniel rauch the book will be of interest to scholars studying art history sculpture artist workshops and european studies from the experts at fine woodworking magazine this complete and easy to follow resource has everything you need to know about the art of woodworking woodworking wisdom know how is the essential go to book for every woodworking project imaginable from building kitchen cabinets to refinishing a deck from the vast cache of fine woodworking s projects and advice topics addressed in this book include types of wood building a workshop working and finishing wood design and styles small and large projects each section is further broken down into chapters that cover specific skills projects and crafts for both the beginner and the advanced woodworker featuring step by step instructions troubleshooting guides and discussions and an appendix of essential resources for supplies tools and materials woodworking wisdom know how is your one stop shop for trusted tried and true woodworking advice this book is also a part of the know how series which includes other titles such as country wisdom know how natural healing wisdom know how craft wisdom know how garden wisdom know how misericordia international was founded by elaine c block as an association dedicated to the study of choir stalls and their relation to other artistic manifestations during the middle ages and the dissemination of research from its beginnings misericordia international has promoted a bi annual international conference as a place of scientific exchange among members of the research community interested in this topic from a multidisciplinary perspective the most recent conference was held from 23 to 26 june 2016 at the ernst moritz arndt university in greifswald germany the theme of the conference was the workshop context of medieval choir stalls in its broadest sense where the iconography of choir stalls has enjoyed a lot of attention from researchers the process and circumstances of the making of these complex objects have often been rather neglected choir stalls were not produced by an individual artist but were created by a group of craftsmen this factor raises all kinds of questions the conference in greifswald covered an obvious need for research and therefore included much hitherto unknown research material and additional first results based on initial research in addition to questions about substantive and economic mechanisms of the production of choir stalls the conference dealt with basic knowledge of craftsmanship this publication presents the papers held at the conference and is divided into five thematic parts namely workshop practices early modern choir stalls traditions or restart stalls of stone a forgotten furniture travelling craftsmen and group of works praxis and politics explores the knowledge arising from activist praxis and its significance for reimagining radical and democratic politics it is based on five years of direct involvement in the toronto based metro network for social justice and their work in coalition building campaign organizing and economic and political literacy work in the aftermath of the signing of the canada us free trade agreement the book breaks new theoretical and methodological ground in social movement studies in drawing on a wide range of traditions including cultural studies urban studies political economy and feminism the first in depth look at how women have shaped the history and legacy of indiana university women first enrolled at indiana university in 1867 in the following years they would leave an indelible mark on this hoosier institution however until now their stories have been underappreciated both on the iu campus and by historians who have paid them little attention women at indiana university draws together 15 snapshots of iu women s experiences and contributions to explore essential questions about their lives and impact what did it mean to write the petition for women s admission or to become the first woman student at an all male university to be a woman of color on a predominantly white campus to balance work studies and commuting entering college as a non traditional student how did women contribute to their academic

fields and departments how did they tap opportunities confront barriers and forge networks of support to achieve their goals women at indiana university not only opens the door to a more inclusive and accurate understanding of iu s past and future but also offers greater visibility for hoosier women in our larger understanding of women in american higher education this book constitutes the refereed proceedings of the 11th international conference on algorithmic learning theory alt 2000 held in sydney australia in december 2000 the 22 revised full papers presented together with three invited papers were carefully reviewed and selected from 39 submissions the papers are organized in topical sections on statistical learning inductive logic programming inductive inference complexity neural networks and other paradigms support vector machines landlord and tenant law contains summaries exercises and workshops to help the reader to make sense of a complex area of law this is an extensively revised fifth edition of this popular text particularly in terms of its coverage of the effects of covenants in leases and also in an expanded section on business tenancies this beautifully illustrated volume explores the history of color across five centuries of european painting unfolding layers of artistic cultural and political meaning through a deep understanding of technique

with the increasing worldwide trend in population migration into urban centers we are beginning to see the emergence of the kinds of mega cities which were once the stuff of science fiction it is clear to most urban planners and developers that accommodating the needs of the tens of millions of inhabitants of those megalopolises in an orderly and uninterrupted manner will require the seamless integration of and real time monitoring and response services for public utilities and transportation systems part speculative look into the future of the world s urban centers part technical blueprint this visionary book helps lay the groundwork for the communication networks and services on which tomorrow s smart cities will run written by a uniquely well qualified author team this book provides detailed insights into the technical requirements for the wireless sensor and actuator networks required to make smart cities a reality

Landlord and Tenant Law

2017-09-16

this book is about appreciation it is an attempt to explain what architecture essentially is rather than merely what it looks like architecture an inspiration is addressed to those who enjoy buildings cities and landscapes and would like to have a deeper appreciation and a basis for their likes and dislikes a full appreciation demands careful observation and in these pages there are many explorations of this sort the book is divided into two parts the first is about the nature of architecture describing what is necessary the chapter headings define

the basic requirements that to varying degrees must always be met such as facilitating activity moderating climate relating to context respecting materials and structure as well as conveying meaning and delight the second part is about the nature of designing and focuses on what the designer brings to the task to arrive at a human and poetic synthesis these different ways of thinking are elusive and not necessarily conscious they include the use of reason and intuition the value of experience and precedent the role of metaphor and the search for harmony for students this is difficult because there is no right way of designing so much of what is written about the architecture of today is negative that it seemed opportune to take a positive approach and point to work that is good now and in the past and reiterate some timeless qualities architecture an inspiration does not set out to be comprehensive ivor smith chooses examples that he finds particularly inspiring from the work of a few selected architects the book will appeal to those both interested in and studying architecture
