ECAI 2000 2000 la science et la technologie sont portées actuellement par un essor économique fort par des révisions stratégiques globales liées à la fin de la guerre froide et à la mondialisation de l'économie et surtout par des découvertes majeures dans les sciences et techniques de l'information et de la communication et dans les sciences de la vie dans ce paysage très évolutif le gouvernement français à l'occasion du comité interministériel de la recherche scientifique et technique du 15 juillet 1998 a retenu la proposition du ministre de l'éducation nationale de la recherche et de la technologie de confier à l'académie des sciences le soin d'établir un rapport sur l'état de la science et de la technologie en france ce rapport est la synthèse de 11 rapports thématiques qui ont été remis au ministre le 27 juillet 2000 le rapprochement des disciplines et des techniques scientifiques dans l'abord des problèmes et dans l'étude des systèmes complexes devrait inciter à ce qu'un accent plus net soit mis sur des projets pluridisciplinaires développés entre plusieurs organismes de recherches ainsi qu'avec des universités et des entreprises cela devrait impliquer aussi une vision nouvelle dans les formations de l'enseignement supérieur dans la politique des grands équipements assortie d'une facilitation de la mobilité des chercheurs tant au sein de l'hexagone qu'à l'extérieur la france doit affirmer davantage sa participation aux grands programmes cadres de l'union européenne qui ont déjà contribué au décloisonnement des équipes même si l'académie reconnaît l'urgence d'une simplification des procédures et la nécessité d'une intervention plus directe des scientifiques dans l'établissement et le suivi de ces programmes par ailleurs il apparaît nécessaire que la communauté scientifique française prenne mieux en compte les enjeux sociétaux et les problèmes éthiques dans un contexte d'ensemble où l'image de la science perd parfois de sa force au delà des propositions liées à chacune des disciplines traitées les auteurs formulent des recommandations visant à adapter le système français de recherche développement et d'enseignement aux nouvelles données scientifiques et économiques

Prophecy and Public Affairs in Later Medieval England 1908 synthèse de 11 rapports thématiques qui traite des découvertes majeures dans les sciences et techniques en particulier dans les sciences de la vie donne des recommandations visant à adapter le système français de recherche développement et d'enseignement aux nouvelles données scientifiques et économiques

Shanghai Customs Daily Returns 1603 this work presents a discourse aware text simplification approach that splits and rephrases complex english sentences within the semantic context in which they occur based on a linguistically grounded

transformation stage complex sentences are transformed into shorter utterances with a simple canonical structure that can be easily analyzed by downstream applications to avoid breaking down the input into a disjointed sequence of statements that is difficult to interpret the author incorporates the semantic context between the split propositions in the form of hierarchical structures and semantic relationships thus generating a novel representation of complex assertions that puts a semantic layer on top of the simplified sentences in a second step she leverages the semantic hierarchy of minimal propositions to improve the performance of open ie frameworks she shows that such systems benefit in two dimensions first the canonical structure of the simplified sentences facilitates the extraction of relational tuples leading to an improved precision and recall of the extracted relations second the semantic hierarchy can be leveraged to enrich the output of existing open ie approaches with additional meta information resulting in a novel lightweight semantic representation for complex text data in the form of normalized and context preserving relational tuples

Annales Ecclesiastici 1603 from the walls of the salon to the pages of weekly newspapers war imagery was immensely popular in postrevolutionary france this fascinating book studies representations of contemporary conflict in the first half of the 19th century and explores how these pictures provided citizens with an imaginative stake in wars being waged in their name as she traces the evolution of images of war from a visual form that had previously been intended for mostly elite audiences to one that was enjoyed by a much broader public over the course of the 19th century katie hornstein carefully considers the influence of emergent technologies and popular media such as lithography photography and panoramas on both artistic style and public taste with close readings and handsome reproductions in various media from monumental battle paintings to popular prints picturing war in france 1792 1856 draws on contemporary art criticism war reporting and the burgeoning illustrated press to reveal the crucial role such images played in shaping modern understandings of conflict
