Electric Vehicle Systems Architecture and Standardization Needs 2015-02-25

this edited volume presents research results of the ppp european green vehicle initiative equi focusing on electric vehicle systems architecture and standardization needs the objectives of energy efficiency and zero emissions in road transportation imply a paradigm shift in the concept of the automobile regarding design materials and propulsion technology a redesign of the electric and electronic architecture provides in many aspects additional potential for reaching these goals at the same time standardization within a broad range of features components and systems is a key enabling factor for a successful market entry of the electric vehicle ev it would lower production cost increase interoperability and compatibilities and sustain market penetration hence novel architectures and testing concepts and standardization approaches for the ev have been the topic of an expert workshop of the european green vehicles initiative ppp this book contains the contributions of current european research projects on ev architecture and an expert view on the status of ev standardization the target audience primarily comprises researchers and experts in the field

Electric Vehicle Batteries: Moving from Research towards Innovation 2014-12-26

this edited volume presents research results of the ppp european green vehicle initiative egvi focusing on electric vehicle batteries electrification is one road towards sustainable road transportation and battery technology is one of the key enabling technologies however at the same time battery technology is one of the main obstacles for a broad commercial launch of electric vehicles this book includes research contributions which try to bridge the gap between research and innovation in the field of battery technology for electric vehicles the target audience primarily comprises researchers and experts in the field

Artificial Intelligence: 101 Things You Must Know Today About Our Future 2018-01-31

do you wonder what the coming years hold for artificial intelligence discover how technological breakthroughs will change your world are you worried that ai will steal your job do you fear you II get left behind in the data driven marketplace are you concerned about ai disrupting your life digital expert speaker and internationally recognized thought leader lasse rouhiainen has educated countless future focused crowds in conferences around the world now he s here to demystify the ai revolution and show you how this inevitable technology will help humankind produce cheaper faster and better than ever artificial intelligence 101 things you must know today about our future is a complete introduction to how emergent technologies impact every aspect of business society and humanity addressing the hottest topics in ai from self driving cars to chatbots and robotic healthcare rouhiainen s comprehensive information answers your burning guestions and addresses obvious fears armed with practical tools and strategies you II learn how to best prepare for an extraordinary wave of innovation in artificial intelligence 101 things you must know today about our future you II discover chatbots robots other automated functions and how these will revolutionize society which industries will be disrupted and how to forward plan how new jobs emerge and what skills you II need to take advantage of them why ethical standards and re education are crucial for a modern workforce charts visual guides and infographics to expand your understanding and much much more artificial intelligence 101 things you must know today about our future is your essential roadmap to guide you into the next generation if you like straightforward explanations of complex issues broad ranging applications and real world examples then you II love lasse rouhiainen s detailed resource buy artificial intelligence to examine this major tech upheaval today

Road Vehicle Automation 5 2018-06-25

this is the fifth volume of a sub series on road vehicle automation published within the lecture notes in mobility like in previous editions scholars engineers and analysts from all around the world have contributed chapters covering human factors ethical legal energy and technology aspects related to automated vehicles as well as transportation infrastructure and public planning the book is based on the automated vehicles symposium which was hosted by the transportation research board trb and the association for unmanned vehicle systems international auvsi in san francisco california usa in july 2017

Road Vehicle Automation 2014-06-07

this contributed volume covers all relevant aspects of road vehicle automation including societal impacts legal matters and technology innovation from the perspectives of a multitude of public and private actors it is based on an expert workshop organized by the transportation research board at stanford university in july 2013 the target audience primarily comprises academic researchers but the book may also be of interest to practitioners and professionals higher levels of road vehicle automation are considered beneficial for road safety energy efficiency productivity convenience and social inclusion the necessary key technologies in the fields of object recognition systems data processing and infrastructure communication have been consistently developed over the recent years and are mostly available on the market today however there is still a need for substantial research and development e g with interactive maps data processing functional safety and the fusion of different data sources driven by stakeholders in the it industry intensive efforts to accelerate the introduction of road vehicle automation are currently underway

The Edinburgh Lectures on Mental Science: And Other Essential Works 2021-07-27

the edinburgh lectures on mental science is an essential new collection of thomas troward s most groundbreaking work thomas troward was an english author writing in the 19th century who was deeply involved in the new thought movement in the edinburgh lectures troward explores the ways that mental action influences material conditions explains the reciprocal action of the universe and much more deeply insightful and profound troward is an indispensable voice in the new thought canon and essential reading for fans of norman vincent peale and napoleon hill this edition of the book also includes your invisible power by geneviève behrend one of troward s students the edinburgh lectures on mental science is part of the library of spiritual wisdom a beautifully designed series of curated classics written by some of the greatest spiritual teachers of all time with books covering topics ranging from prosperity and motivation to the occult and metaphysical thought the library of spiritual wisdom is the definitive collection of texts from some of the most revolutionary thought leaders of the last two centuries and belongs on the shelves of home libraries everywhere

Road Vehicle Automation 3 2016-07-01

this edited book comprises papers about the impacts benefits and challenges of connected and automated cars it is the third volume of the Inmob series dealing with road vehicle automation the book comprises contributions from researchers industry practitioners and policy makers covering perspectives from the u s europe and japan it is based on the automated vehicles symposium 2015 which was jointly organized by the association of unmanned vehicle systems international auvsi and the transportation research board trb in ann arbor michigan in july 2015 the topical spectrum includes but is not limited to public sector activities human factors ethical and business aspects energy and technological perspectives vehicle systems and transportation infrastructure this book is an indispensable source of information for academic researchers industrial engineers and policy makers interested in the topic of road vehicle automation

Enhancing Education and Training Initiatives Through Serious Games 2017-09-13

games have become popular tools to enhance learning in both educational and business environments analyzing the link between games and their results on students can help provide advances for learning initiatives in the future enhancing education and training initiatives through serious games is an essential reference source that examines the impact that games and simulations have within different learning environments featuring in depth discussions on relevant topics including self reporting surveys project management techniques academic training and game design this publication is an ideal resource for academicians students business owners and professionals that are interested in discovering the advances of serious gaming techniques

The Voice of Science 2021-10-12

for many in the nineteenth century the spoken word had a vivacity and power that exceeded other modes of communication this conviction helped to sustain a diverse and dynamic lecture culture that provided a crucial vehicle for shaping and contesting cultural norms and beliefs as science increasingly became part of public culture and debate its spokespersons recognized the need to harness the presumed power of public speech to recommend the moral relevance of scientific ideas and attitudes with this wider context in mind the voice of science explores the efforts of five celebrity british scientists john tyndall thomas henry huxley richard proctor alfred russel wallace and henry drummond to articulate and embody a moral vision of the scientific life on american lecture platforms these evangelists for science negotiated the fraught but intimate relationship between platform and newsprint culture and faced the demands of audiences searching for meaningful and memorable lecture performances as diarmid finnegan reveals all five attracted unrivaled attention provoking responses in the press from church pulpits and on other platforms their lectures became potent cultural catalysts provoking far reaching debate on the consequences and relevance of scientific thought for reconstructing cultural meaning and moral purpose

Atlantis Initiatives 2010-11-24

briefly atlantis like oxford offers even the entering student much the same privileges and responsibilities as a junior faculty member or researcher all courses are prepared extensively before they open demand an entrance exam to participate meet in groups of four once a week focus on presentation and discussion of student work which is built up into potentially publishable portfolios this method as used n oxford and cambridge enables students to complete six years of academic work in just half that time and boasts a retention rate of 96

Modern Management Based on Big Data III 2022-09-29

data is the basic ingredient of all big data applications and big data technologies are constantly deploying new strategies to maximise efficiency and reduce the time taken to process information this book presents the proceedings of mmbd2022 the third edition of the conference series modern management based on big data mmbd the conference was originally scheduled to take place from 15 to 18 august 2022 in seoul south korea but was changed to a virtual event on the same dates some 200 submissions were received for presentation at the conference 52 of which were ultimately accepted after exhaustive review by members of the programme committee and peer reviewers who took into account the breadth and depth of the research topics and the scope of mmbd topics covered include data analytics modelling technologies and visualization architectures for parallel processing systems data mining tools and techniques machine learning algorithms and big data for engineering applications there are also papers covering modern management including topics such as strategy decision making manufacturing and logistics based systems engineering economy information systems and law based information treatment and papers from a special session covering big data in manufacturing retail healthcare accounting banking education global trading and e commerce big data analysis and emerging applications were popular topics the book includes many innovative and original ideas as well as results of general significance all supported by clear and rigorous reasoning and compelling evidence and methods and will be of interest to all those working with big data

<u>Contemporary international relations.</u> <u>Great power politics. Theory and practice:</u> <u>Lectures</u> 2023-08-19

the current book contemporary international relations great power politics theory and practice is a series of lectures based on the author s large scale scholarly research called mirology through years of work battler has developed a comprehensive categorial and conceptual framework for understanding world and international relations wir this lecture course offers a unique approach that sets it apart from similar works the author draws conclusions and inferences from the linking theory and practice resulting in a fresh perspective on evaluating the foreign and domestic policies of the united states china japan and russia the lectures are primarily intended for experts and tutors in politics security economics foreign affairs and journalism they are also for those curious and wanting to expand their knowledge about the world

Proceedings of the ... IEEE Intelligent Vehicles Symposium 2003

developed in partnership with the american academy of orthopaedic surgeons aaos and edited by brian j galinat md mba faaos editor and ronald a navarro md faaos assistant editor instructional course lectures volume 72 offers current clinically relevant information across a broad spectrum of orthopaedic topics these lectures were written by the orthopaedic surgeons who presented at the 2022 aaos annual meeting this all new volume covers topics such as increasing diversity in orthopaedics controversies in total knee replacement biologics and sports medicine endoscopic spine surgery and more

Instructional Course Lectures: Volume 72 2023-01-05

this paper collection is the second volume of the Inmob series on road vehicle automation the book contains a comprehensive review of current technical socio economic and legal perspectives written by experts coming from public authorities companies and universities in the u s europe and japan it originates from the automated vehicle symposium 2014 which was jointly organized by the association for unmanned vehicle systems international auvsi and the transportation research board trb in burlingame ca in july 2014 the contributions discuss the challenges arising from the integration of highly automated and self driving vehicles into the transportation system with a focus on human factors and different deployment scenarios this book is an indispensable source of information for academic researchers industrial engineers and policy makers interested in the topic of road vehicle automation

Road Vehicle Automation 2 2015-06-30

the book analyzes the problems and potential of renewable energy development for the coachella valley of california and provides a useful case study for renewable energy feasibility assessments for other areas a conceptual model integrated policy assessment theory for renewable energy is given and justified for renewable energy development in the valley further central place theory well known in urban geography is discussed and it is seen to be very relevant to the understanding the coachella valley s city sizes and renewable energy markets compared to the greater los angeles region the book s research methods include geospatial mapping and analysis and interviews leaders in small innovative firms government agencies and nonprofits the many findings of the book include evaluation of how the valley s socioeconomic and transportation features influence renewable energy development the scope of markets for solar and wind energy in the valley spatial confluences of renewable energy facilities with other features and the future potential of ground source heat pumps benchmark comparison of the coachella valley is done with two leading wind and solar regions elsewhere in the country to assess the valley s evolution and

opportunities in renewable energy the book concludes by evaluating the prospects and problems for the growth of renewable entrepreneurship manufacturing assembly and operations in coachella valley this leads to policy recommendations grounded in the book s research findings which are intended for use by governments businesses and nonprofits the hope is that many of the developmental experiences from the coachella valley will be helpful not only within the valley but to other communities nationwide and worldwide

Renewable Energy: Problems and Prospects in Coachella Valley, California 2017-02-07

a runaway trolley is speeding down a track so begins what is perhaps the most fecund thought experiment of the past several decades since its invention by philippa foot since then moral philosophers have applied the trolley problem as a thought experiment to study many different ethical conflicts and chief among them is the programming of autonomous vehicles nowadays however very few philosophers accept that the trolley problem is a perfect analogy for driverless cars or that the situations autonomous vehicles face will resemble the forced choice of the unlucky bystander in the original thought experiment this book represents a substantial and purposeful effort to move the academic discussion beyond the trolley problem to the broader ethical legal and social implications that autonomous vehicles present there are still urgent questions waiting to be addressed for example how avs might interact with human drivers in mixed or hybrid traffic environments how avs might reshape our urban landscapes what unique security or privacy concerns are raised by avs as connected devices in the internet of things how the benefits and burdens of this new technology including mobility traffic congestion and pollution will be distributed throughout society and more an attempt to map the landscape of these next generation guestions and to suggest preliminary answers this volume draws on the disciplines of philosophy sociology economics urban planning and transportation engineering business ethics and more and represents a global range of perspectives

Auto Mechanics and Auto Drivers ... 2022

the security situation in mexico has deteriorated in recent years to help

inform debate on the future of u s mexico relations this study examined a set of u s policy options and potential policy priorities that hold promise for mexico s security

Autonomous Vehicle Ethics 2009-05-01

this volume of annals of information systems will acknowledge the twentieth anniversary of the founding of the international society for decision support systems isdss by documenting some of the current best practices in teaching and research and envisioning the next twenty years in the decision support systems field the volume is intended to complement existing dss literature by offering an outlet for thoughts and research particularly suited to the theme of describing the next twenty years in the area of decision support several subthemes are planned for the volume one subtheme draws on the assessments of internationally known dss researchers to evaluate where the field has been and what has been accomplished a second subtheme of the volume will be describing the current best practices of dss research and teaching efforts a third subtheme will be an assessment by top dss scholars on where the dss discipline needs to focus in the future the tone of this volume is one of enthusiasm for the potential contributions to come in the area of dss contributions that must incorporate an understanding of what has been accomplished in the past build on the best practices of today and be be integrated into future decision making practices the primary questions raised by this volume are what will information systems based decision support entail in twenty years what research is needed to realize the envisioned future of information systems based decision support how will the teaching of information systems based decision support change over the next twenty years what are the best practices of teaching in the decision support area that can be leveraged to best disseminate dss knowledge advances to students and practitioners

Security in Mexico 2010-11-25

this book presents selected articles from india smart utilty week isuw 2021 which is the seventh edition of the conference cum exhibition on smart grids and smart cities organized by india smart grid forum from 02 05 march 2021 in new delhi india isgf is a public private partnership initiative of the ministry of power govt of india with the mandate of accelerating smart grid deployments across the country this book gives current scenario updates of indian power sector business it also

highlights various disruptive technologies for power sector business

Decision Support 2022-05-27

this book focuses on the two intra regional initiatives created for the development and integration of energy markets the energy community and medreg the energy community and medreg apart from their common strategic role in providing a much needed stable regulatory environment for energy markets in their respective reference countries represent examples of a diverse development of regional energy initiatives the former is initiated by external factors and is an example of a top down approach whereas the latter is a voluntary bottom up initiative of the countries involved the way the institutional framework is built is not without consequences on the functioning and organization of the two regional initiatives the book assesses these different approaches and their consequences in the framework of the development of the energy community and medreg with particular reference to their impact on regional integration energy policy and institutional change the analysis is enriched with several case studies on the role of independent regulatory agencies the promotion of renewable energy sources infrastructure and interconnection development across the mediterranean basin and the implications of exporting the eu institutional model this book is aimed at policy makers institutions energy companies and academics to provide a better understanding of the economic and institutional eco system that characterize the mediterranean area

ISUW 2021 2014-06-13

cryptography will continue to play important roles in developing of new security solutions which will be in great demand with the advent of high speed next generation communication systems and networks this book discusses some of the critical security challenges faced by today s computing world and provides insights to possible mechanisms to defend against these attacks the book contains sixteen chapters which deal with security and privacy issues in computing and communication networks quantum cryptography and the evolutionary concepts of cryptography and their applications like chaos based cryptography and dna cryptography it will be useful for researchers engineers graduate and doctoral students working in cryptography and security related areas it will also be useful for faculty members of graduate schools and universities

Regional Energy Initiatives 2012-03-14

this book features high quality research papers presented at the 2nd international conference on sustainable expert systems icses 2021 held in nepal during september 17 18 2021 the book focusses on the research information related to artificial intelligence sustainability and expert systems applied in almost all the areas of industries government sectors and educational institutions worldwide the main thrust of the book is to publish the conference papers that deal with the design implementation development testing and management of intelligent and sustainable expert systems and also to provide both theoretical and practical guidelines for the deployment of these systems

Applied Cryptography and Network Security 2022-02-26

this book presents cutting edge research papers in the field of underwater system technology in malaysia and asia in general the topics covered include intelligent robotics novel sensor technologies control algorithms acoustic signal processing imaging techniques biomimetic robots green energy sources and underwater communication backbones and protocols the book showcases some of the latest technologies and applications developed to facilitate local marine exploration and exploitation it also addresses related topics concerning the sustainable development goals sdg outlined by the united nations

Proceedings of Second International Conference on Sustainable Expert Systems 2019-02-08

the changing world and lectures to theosophical students by annie besant published by good press good press publishes a wide range of titles that encompasses every genre from well known classics literary fiction and non fiction to forgotten or yet undiscovered gems of world literature we issue the books that need to be read each good press edition has been meticulously edited and formatted to boost readability for all e readers and devices our goal is to produce ebooks that are user friendly and accessible to everyone in a high quality digital format

The changing world, and lectures to theosophical students 2003

this contributed volume brings together research papers presented at the 4th international conference on dynamics in logistics held in bremen germany in february 2014 the conference focused on the identification analysis and description of the dynamics of logistics processes and networks topics covered range from the modeling and planning of processes to innovative methods like autonomous control and knowledge management to the latest technologies provided by radio frequency identification mobile communication and networking the growing dynamic poses wholly new challenges logistics processes and networks must be come able to rapidly and flexibly adapt to constantly changing conditions the book primarily addresses the needs of researchers and practitioners from the field of logistics but will also be beneficial for graduate students

Centennial of Powered Flight 1992

published in partnership with the washington center for improving the quality of undergraduate education first year seminars and learning communities are two of the most commonly offered high impact practices on u s campuses the goals of these initiatives are similar helping students make connections to faculty and other students improving academic performance and increasing persistence and graduation as such it is not surprising that many institutions choose to embed first year seminars in learning communities this volume explores the merger of these two high impact practices in particular it offers insight into how institutions connect them and the impact of those combined structures on student learning and success in addition to chapters highlighting strategies for designing teaching in and assessing combined programs case studies offer practical insights into the structures of these programs in a variety of campus settings

Community-based Anti-drug Initiatives 2015-12-21

in a call to planetary thinking planetary building and planetary dwelling norman k swazo discusses heidegger s thought as it relates to issues of global politics specifically the domain of world order studies in the first division of the book swazo provides a theoretical critique of world order studies understood in the two modes of normative and technocratic futurism the book s second division includes a preliminary attempt to clarify what heidegger s call for essential thinking entails for political thinking this signifies a new beginning for political discourse heralded in the possibility of essential political thinking that swazo calls autarchology

Dynamics in Logistics 1997

this title is directed primarily towards health care professionals outside of the united states it is the authoritative textbook for students of learning disabilities covering a wide variety of topics it is relevant not only for nursing courses but also for care workers ots and other professional and non professional carers the new edition has been completely updated and includes the latest evidence for practice there are new chapters which means the book provides comprehensive coverage of learning disabilities throughout a person s life there are also new contributors including people with learning disabilities each chapter is supported by information on further reading and other resources

Applied Mechanics Reviews 2016-05-17

this volume analyzes the conditions that promote the creation and development of educational technology in advanced industrial nations and the subsequent transfer of that technology to developing countries four technologies print media television radio computers and operating systems are examined in the context of both industrialized and developing nations the problems that the developing countries face when adopting new technologies for their educational needs political and economic conditions and cultural characteristics are discussed
