EINSTEIN'S UNIVERSE WITHOUT BIG BANG 2015-05-07

Einstein was right the Big Bang never happened Einstein's universe comes on the basis of the spiritual ideas of a Belgian priest and an Indian Brahmin so called modern cosmology has been peddling unadulterated mysticism for decades now this mysticism has found worldwide distribution especially through a plethora of television documentaries despite the fact that their pseudoscientific content has been proven to lie completely outside the laws of physics in this way people have been led to believe that 95 percent of our universe consists of mystical dark energy and dark matter and only 5 percent of the universe is accessible to us empirically but what lies behind the scandalous and lamentable failure of an entire branch of astrophysical science and who has an interest in promoting this mysticism the author of the book reveals clearly how the scandalous failure of a whole branch of science came about and explains the actual dynamics of the universe using the reputable physical findings of Isaac Newton Max Planck Albert Einstein and Karl Schwarzschild almost everything about the universe that you believe to be true is demonstrably false a mixture of mysticism and science fiction after 100 years Einstein's idea of a static universe has turned out to be true after all there was definitely no Big Bang nor are there so called black holes in which space mass and time collapse to a point but rather relativistic black spheres these black spheres are the solution of Hawking's paradox further information Einstein's universe comes on

Power Without Knowledge 2020

technocrats claim to know how to solve the social and economic problems of complex modern societies but as jeffrey friedman argues in power without knowledge there is a fundamental flaw with technocracy it requires an ability to predict how the people whom technocrats attempt to control will act in response to technocratic policies however the mass public s ideas the ideas that drive their actions are far too varied and diverse to be reliably predicted but that is not the only problem friedman reminds us that a large part of contemporary mass politics even populist mass politics is essentially technocratic too members of the general public often assume that they are competent to decide which policies or politicians will be able to solve social and economic problems yet these ordinary citizen technocrats typically regard the solutions to social problems as self evident such that politics becomes a matter of vetting public officials for their good intentions and strong wills not their technocratic expertise finally friedman argues that technocratic experts themselves drastically oversimplify technocratic realities economists for example theorize that people respond rationally to the incentives they face this theory is simplistic but it gives the appearance of being able to predict people s behavior in response to technocratic policy initiatives if stripped of such gross oversimplifications though technocrats themselves would be forced to admit that a rational technocracy is nothing more than an impossible dream ranging widely over the philosophy of social science rational choice theory and empirical political science power without knowledge is a pathbreaking work that upends traditional assumptions about technocracy and politics forcing us to rethink our assumptions about the legitimacy of modern governance
