a powerful argument for abortion as a moral right and social good by a noted feminist and longtime columnist for the nation forty years after the landmark roe v wade ruling abortion is still a word that is said with outright hostility by many despite the fact that one in three american women will have terminated at least one pregnancy by menopause even those who support a woman s right to an abortion often qualify their support by saying abortion is a bad thing an agonizing decision making the medical procedure so remote and radioactive that it takes it out of the world of the everyday turning an act that is normal and necessary into something shameful and secretive meanwhile with each passing day the rights upheld by the supreme court are being systematically eroded by state laws designed to end abortion outright in this urgent controversial book katha pollitt reframes abortion as a common part of a woman s reproductive life one that should be accepted as a moral right with positive social implications in pro pollitt takes on the personhood argument reaffirms the priority of a woman s life and health and discusses why terminating a pregnancy can be a force for good for women families and society it is time pollitt argues that we reclaim the lives and the rights of women and mothers

## Deliver Us From Abortion

the author of abortion the ultimate exploitation of women offers a blueprint for the american church to handle abortion in our country consider that for the past forty years a staggering fifty six million americans have been killed by abortion it claims the lives of over 1 2 million children every year or roughly one child every twenty five seconds so why isn t the american church doing something to stop this atrocity which is the greatest holocaust in american history the majority of american churches god s institutions for spreading the gospel of peace and defending the weak and innocent remain silent feeding the poor stopping human trafficking rescuing children from abuse and protecting women from exploitation are all issues the church is addressing yet abortion remains eerily absent from the list of church priorities in america why isn t it the church s highest priority is the american church silent because abortion has become politicized and church leaders are afraid to discuss it or because we simply don t know what the bible says about it what will cause the church to wake up rise up and take this issue to task to save our children in his latest book deliver us from abortion brian fisher co founder and president of online for life breaks the veil of silence and uncovers the reality of abortion in the church what the bible really says about it and how god has empowered his church to end this unspeakable tragedy praise for deliver us from abortion this book provides a powerful defense for the children who can t speak for themselves josh mcdowell bestselling author of 138 books including more than a carpenter abortion is the greatest moral crisis of our generation yet far too many churches have remained silent in deliver us from abortion brian fisher offers a blueprint for the american church that is both instructive and encouraging i pray that we can all hear and accept his challenge dr tony evans president the urban alternative senior pastor oak cliff bible fellowship growing up in the king family during the civil rights era i know what the church can accomplish i am so glad brian has written this book may it challenge and equip the church to end the abortion holocaust in america dr alveda king director of african american outreach priests for life

sidney callahan and daniel callahan this book like many other things to do with abortion is a product of long controversy though carried out with cooperation it was conceived in conflict the conflict between the coeditors has persisted for years in fact for at least half of their thirty year marriage one sidney is prolife the other daniel is prochoice ever since the topic of abortion became of professional interest to us in the 1960s we have disagreed at one time while daniel was writing a book on the subject abortion law choice and morality 1970 we talked about the subject every day for the four years of the book s gestation on many occasions during the 1970s prolife articles writ ten by sidney were passed out at daniel s lectures in order to refute his pro choice views over the years every argument every statistic every historical example cited in the literature has been discussed by the two of us as eliza doolittle says about words in my fair lady there s nota one i haven t heard and yet we still disagree how can it be we ask ourselves that intelligent people of goodwill who know all the same facts and all the same arguments still come down on different sides of the con troversy as we well know it is possible to agree about many things and have great love and respect for an opponent and still differ

does the relentless pursuit of a single policy objective on which there are deeply felt opposing positions endanger governmental and political institutions that citizens value and depend on out of concern that the abortion dispute might pose just such a question the brookings institution invited pro life and pro choice activists to join a group of public affairs experts at a symposium on the effects of the dispute on the american system this volume presents an introductory essay that explains the issues involved the appraisals that provided the starting point for the symposium discussion and a summary of the reactions of symposium participants lawrence m friedman appraises the abortion dispute in a constitutional context focusing on the 1973 supreme court decision roe v wade which legitimized abortion under certain ground rules roger h davidson considers the effects of the abortion dispute on congressional procedures g calvin mackenzie discusses the ways in which the presidential appointment process has been affected by the consideration of nominees s views on abortion john e jackson and maris a vinovskis analyze the role of abortion as a single issue in electoral politics a historical note by cynthia e harrison reviews the prohibition experience an earlier attempt to regulate conduct by constitutional restraint the general conclusion of the scholars who wrote these essays as well as the activists and others participating in the symposium was that the abortion dispute does not jeopardize governmental institutions even the unprecedented or unique political techniques used by the advocates on both sides are regarded as within the norms of traditional american politics

in this book lori brown examines the relationship between space defined physically legally and legislatively and how these factors directly impact the spaces of abortion it analyzes how various political entities shape the physical landscapes of inclusion and exclusion to reproductive healthcare access and questions what architecture s responsibilities are in respect to this spatial conflict employing writing drawing and mapping methodologies this interdisciplinary project explores restrictions and legislatures which directly influence abortion policy in the us mexico and canada it questions how these legal rulings produce spatial complexities and why architecture isn t more culturally and spatially engaged with these spaces in mexico where abortion is fully legal only in mexico city during the first trimester women must travel vast distances and undergo extreme conditions in order to access the procedure conservative state governments continue to make abortion a severely punishable crime in canada there are nowhere near the cultural and religious stigmas to abortion as in the us and mexico completely legal and without restrictions canada offers an important contrast to the ongoing abortion issues within the us and mexico researching the spatial implications of such a politicized space this book expands beyond a study of abortion clinic and includes other spaces such as women s shelters and hospitals that require multiple levels of secured spaces in order to discuss the spatial ramifications of access and security within spaces that are highly personal private and sometimes secret or even hidden in questioning what architecture s responsibility is in these spatial conflicts the book looks at how what architecture does can be used to reconsider the spaces and security around such contested places and ultimately suggests what design s potential impact might be in doing so it shows how architecture s role might be redefined within social and spatial practices

india was a pioneer in legalizing induced abortion or medical termination of pregnancy mtp in 1971 yet after three decades morbidity and mortality due to unsafe abortion remain a serious problem there is little public debate on the issue despite several national campaigns on safe motherhood instead discussion on abortion has mainly centred around declining sex ratio sex selective abortion and the proliferation of abortion clinics in urban areas adding to the problem is that abortion continues to be a sensitive private matter often with ethical moral religious connotations that sets it apart from other reproductive health seeking behaviour this book fills a gap in our understanding of the ground realities with respect to induced abortion in india to create an evidence based body of knowledge using both quantitative and qualitative research methods the case studies show why and under what circumstances women seek abortion and the quality of services available to them they also explore inter generational differences in attitudes and practices the perceptions and selection of providers female selective abortion and informal abortion practitioners among other issues the contributors show that strong preference for sons availability of modern techniques for diagnostic tests widespread acceptance of the small family norm and heavy reliance on female sterilisation as the primary method of contraception lead women to abort unwanted pregnancies a book that goes beyond the smokescreen of data and regulations to unravel the human story behind elective abortion it will be of interest to those studying health public policy and gender apart from the general reader
