## ***Risk in Children's Adventure Literature***

2024-05-31

risk in children s adventure literature examines the way in which adults discuss the reading and entertainment habits of children and with it the assumption that adventure is a timeless and stable constant whose meaning and value is self evident a closer enquiry into british and american adventure texts for children over the past 150 years reveals a host of complexities occluded by the term and the ways in which adults invoke adventure as a means of attempting to get to grips with the nebulous figure of the child writing about adventure also necessitates writing about risk and this book argues that adults have historically used adventure to conceptualise the relationship between children and risk the risks children themselves pose to society the risks that threaten their development and how they can be trained to manage risk in socially normative and desirable ways tracing this tendency back to its development and consolidation in victorian imperial romance and forward through various adventure texts and media to the present day this book probes and investigates the truisms and assumptions that underlie our generalisations about children s love for adventure and how they have evolved since the mid nineteenth century

social representation of entrepreneurship is naive successful entrepreneurs are visionaries adept at identifying opportunity planning implementing and realizing the opportunity the reality of business creation is very different an entrepreneur starts with his skills vision and commitment he has self confidence in a business that

doesn't exist he believes that he can do it without having done it before he has to sustain his belief over time whatever the challenges and evoke the same belief in customers suppliers and stakeholders his focus is implementation he has setbacks when ideas don't work he has to remain upbeat perseverance needs courage and conviction amidst uncertainty and often desperation entrepreneurs are always grappling with dichotomous ideas should they trust the path they are on or change direction creation of business is a capability that entrepreneurs learn on the job the way entrepreneurs work and think is a significant variable in the creation of a new business the hypothesis of the book is that entrepreneurship is not only about what successful entrepreneurs do who they are or whom they know but more importantly about how they do it the entrepreneurial process revealed in the interviews has universal application as a way of entrepreneurship it expands the potential of entrepreneurship methods of working and thinking are free resources accessible to everyone therefore everyone has the potential to be an entrepreneur ideas and opportunities emerge from a way of thinking and doing implementation is graduation in entrepreneurship the book is based on a collection of startup journeys of entrepreneurs the book captures the thoughts and behaviors of a pre-success entrepreneur there is a difference in how these moments are experienced by entrepreneurs as they occur and read by others ex post facto
