proponents of market driven education reform view vouchers and charters as superior to local board run community based public schools however the author of this timely volume argues that there is no clear research supporting this view in fact she claims there is increasing evidence of charter mismanagement with public funding all too often being squandered while public schools are being closed or consolidated tracing the origins of vouchers and charters in the united states this book examines the push to globally compete with education systems in countries such as china and finland it documents issues important to the school choice debate including the impoverishment of public schools to support privatized schools the abandonment of long held principles of public education questionable disciplinary practices and community disruption school choice the end of public education is essential reading for anyone seeking a deeper understanding of the past and future of public education in america book features provides a comprehensive historical account of the origins of vouchers and charters includes accounts of intriguing historical experiences examines the defunding of neighborhood public schools in favor of often underregulated charters reveals charter school churn that often follows the closing of a mismanaged charter provides a cogent counternarrative to the claim that charters are necessary for america to compete globally how fortunate that we have another soon to be classic from mercedes schneider that informs and empowers us all for the fight back joyce e king georgia state university schneider provides a must read for anyone especially educators interested in the future of public education margaret mary sulentic dowell louisiana state university outstanding powerful this is the most interesting and best researched book on school choice i ve ever read julian vasquez heilig california state university term limits enjoy broad popularity among americans yet scholarly literature has omitted two important questions from the study of municipal reform why are term limits so popular and what are the causes of movements for term limits in this book douglas cantor exposes the causes of term limits at the local level of government to shed light on how and why the movement to adopt term limits came to exist cantor begins his analysis by providing a history of term limits beginning with classical debates in greek philosophy he describes the benefits of studying the causes of term limits and how term limits are a direct manifestation of older values rooted in the american traditions of municipal reform part ii examines 20 different municipalities across the continental united states that experienced a movement to implement term limits through a political campaign voter initiative or council led charter amendment written to a common template and examining each case through the lens of the reform impulse cantor argues that the institutional lineage of the progressives namely council manager governments at large elections and nonpartisanship is largely responsible for movements to implement term limits somewhere in the united states in almost every election terms limits and the modern era of municipal reform brings a new dimension to the progressive era championing the study of local politics and its importance to understanding american politics law of the internet fourth edition is a two volume up to date legal resource covering electronic commerce and online contracts privacy and network information and leisure environment the horse racing industry has been a pioneer in interactive media information networks and their deployment the race track and the off track betting parlor offer interactive media environments that reconfigure the relationships among private and public space and presence and copresence in this book holly kruse explores how horse racing has used media over the last several decades arguing that examining the history and context of horse racing and gambling gives us a clearer understanding of the development of data networks media complexes public entertainment and media publics kruse describes an enormous industry that depends on global information and communication flows made possible by a network linking racetracks homes off track betting farms and auction sites racetrack architecture now allows for the presence of screens most showing races from other locations online betting sites enable bettors to wager from home off track betting facilities collect wagers on races from all over the country odds are set interactively through the pari mutuel market system kruse considers the uses of public space and its redefinition by public screens the effect of interactive media on the racing industry including networked in home betting the technopanic over online poker and the popularity of in home pari mutuel wagering and the use of social media by racing fans to share information and creative work with no financial payoff ocean and coastal law has grown rapidly in the past three decades as a specialty area within natural resources law and environmental law the protection of oceans has received increased attention in the past decade because of sea level rise ocean acidification the global overfishing crisis widespread depletion of marine biodiversity such as marine mammals and coral reefs and marine pollution paralleling the growth of ocean and coastal law climate change regulation has emerged as a focus of international environmental diplomacy and has gained increased attention in the wake of disturbing and abrupt climate change related impacts throughout the world that have profound implications for ocean and coastal regulation and marine resources climate change impacts on ocean and coastal law effectively unites these two worlds it raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents to resources in the oceans and coasts of the u s and the world this comprehensive work assembles the insights of global experts from academia and major ngos e g center for international environmental law ocean conservancy and environmental law institute to address regulatory challenges from the perspectives of u s law foreign domestic law and international law the civil war on film will inform high school and college readers interested in civil war film history on issues that arise when film viewers confuse entertainment with historical accuracy the nation s years of civil war were painful destructive and unpleasant yet war films tend to embrace mythologies that erase that historical reality romanticizing the civil war the editors of this volume have little patience for any argument that implies race based slavery isn t an entirely repugnant economic political and cultural institution and that the people who fought to preserve slavery were fighting for a glorious and admirable cause to that end the civil war on film will open with a timeline and introduction and then explore ten films across decades of cinema history in ten chapters from birth of a nation which debuted in 1915 to the free state of jones which debuted one hundred and one years later it will also analyze and critique the myriad of mythologies and ideologies which appear in american civil war films including lost cause ideation black confederate fictions northern aggression mythologies and white savior tropes it will also suggest the way particular films mirror the time in which they were written and filmed further resources will close the volume the disputes around fracking and oil and gas policy follow a long tradition of complicated intergovernmental relationships proponents argue that fracking supports new and well paying jobs revitalizes state and local economies and that it can help replace reliance on other fossil fuels skeptics and opponents contend that oil and gas production via fracking contaminates air and water resources causes earthquakes and can ruin the character of many communities examining the intergovernmental politics of the first oil and natural gas boom of the 21st century the fracking debate second edition offers a holistic understanding of the politics that characterize oil and natural gas operations including why local governments are challenging their state s preemptive authority in order to initiate a larger conversation about improving intergovernmental relationships author jonathan fisk presents a novel argument about the ways in which local state regional and national approaches to governance of shale gas development can work together to reduce conflict and forward the interests of the communities exposed to development asking important questions such as what state structures govern state local relations what state institutions impact and shape oil and gas production what is the policymaking context in the state what are the costs and benefits of hydraulic fracturing at the national state and local levels how are risks and rewards distributed within states what local policies have challenged the state and what do local communities challenge the state the rest of the book is a book that demonstrates that when stakeholders

acknowledge their interdependencies and one another's expertise they create design and implement more responsive strategic and targeted public policies the fracking debate second edition will be required reading for courses on oil and gas policy in the united states environmental politics and domestic energy politics as well as a vital reference for practitioners and policymakers working in these fields symbolic ornamentation inspired by ancient greek and roman art is a long standing western tradition the author explores the designs of 18th century english gunsmiths who engraved classical ornamental patterns on firearms gifted or traded to american indians a system of allegory is found that symbolized the americas of the new world in general and that enshrined the american indian peoples as noble savages the same allegorical context was drawn upon for symbols of national liberty in the early american republic inadvertently many of the symbolic designs used on the trade guns strongly resonated with several native american spiritual traditions the impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income however not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts the contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints this leads to comparison and discussion of what living within the limits of the planet might mean current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives this book takes a bottom up approach by calculating the footprints of daily living the purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies when you want only one source of information about your city or county turn to county and city extra this trusted reference compiles information from many sources to provide all the key demographic and economic data for every state county metropolitan area congressional district and for all cities in the united states with a 2010 population of 25 000 or more in one volume you can conveniently find data from 1990 to 2015 in easy to read tables no other resource compiles this amount of detailed information into one place subjects covered in county and city extra include population by age and race government finances income and poverty manufacturing trade and services crime housing education immigration and migration labor force and employment agriculture land and water residential construction health resources voting and elections the main body of this volume contains five basic parts and covers the following areas part a states part b counties part c metropolitan areas part d cities with a 2010 census population of 25 000 or more part e congressional districts in addition this publication includes figures and text in each section that highlight pertinent data and provide analysis ranking tables which present each geography type by various subjects including population land area population density educational attainment housing values race unemployment and crime multiple color maps of the united states on various topics including median household income poverty voting and race furthermore this volume contains several appendixes which include notes and explanations for further reference definitions of geographic concepts a listing of metropolitan and micropolitan areas and their component counties a list of cities by county maps showing congressional districts counties and selected places within each state new in the 24th edition this edition includes data from the 2012 economic census recently released for states counties metropolitan areas and cities table e has been expanded to include newly available county business patterns data for congressional districts table e includes a wide selection of 2014 american community survey data social security data and data from the 2012 census of agriculture for the congressional districts of the 114th congress along with the 114th congressional representatives big data has the power to change all aspects of agriculture environmental protection and healthcare especially in developing countries by allowing new levels of analysis and tailoring of impacts how big data will impact will benefit smallholder farmers relative to global multinationals the book considers how big data can changing the way lenders assess creditworthiness of potential borrowers data privacy and security issues are important issues the key ideas concepts and theories presented are explored illustrated and contrasted through in depth case studies of developing world based big data companies and deployment and utilization big data in agriculture environmental protection and healthcare today concerns about the financial stability of social security trends in disability health care costs and the supply of caregivers are all driven by the coming explosion in the population of those over the age of 65 aging in america focuses on the economic and demographic portrait of the senior population and can provide a range of characteristics of the older population for analysis of broader population issues

population including age composition race and hispanic origin educational attainment living arrangements veteran status employment and income health insurance disability and housing characteristics some of the benefits of aging in america include it provides a cross section of socio economic characteristics focused on the aging population for commonly researched geographic areas states counties cities metropolitan and micropolitan areas and congressional districts the tables are structured to allow easy comparisons across geographic areas and easy profiling of characteristics for any area of reader interest this publication fills an information gap because of the difficulty in extracting comparative data from the census bureau s american factfinder dissemination system users will have comparative data in a single reference volume the state and metropolitan area data book is the continuation of the u s census bureau s discontinued publication it is a convenient summary of statistics on the social and economic structure of the states metropolitan areas and micropolitan areas in the united states it is designed to serve as a statistical reference and guide to other data publications and sources this new edition features more than 1 500 data items from a variety of sources it covers many key topical areas including population birth and death rates health coverage school enrollment crime rates income and housing employment transportation and government the metropolitan area information is based on the latest set of definitions of metropolitan and micropolitan areas including a complete listing and data for all states metropolitan areas including micropolitan areas and their component counties 2010 census counts and more recent population estimates for all areas results of the 2016 national and state elections expanded vital statistics communication and criminal justice data data on migration and commuting habits american community survey 1 and 3 year estimates data on health insurance and housing and finance matters accurate and helpful citations to allow the user to directly consult the source source notes and explanations a guide to state statistical abstracts and state information economic development officials regional planners urban researchers college students and data users can easily see the trends and changes affecting the nation today covers receipts and expenditures of appropriations and other funds mediating black religious studies spirituality studies and liberation theology philip butler explores what might happen if black people in the united states merged technology and spirituality in their fight towards materializing liberating realities the discussions shaping what it means for humans to exist with technology and as part of technology are already underway transhumanism suggests that any use of technology to augment intellectual psychological or physical capability makes one transhuman in an attempt to encourage black people in the united states to become technological progenitors as a spiritual act butler asks whether anyone has ever been just human butler then explores the implications of this question and its link to viewing the body as technology re imagining incarnation as a relationship between vitality biochemistry and genetics the book also takes a critical scientific approach to understanding the biological embodiment of black spiritual practices it shows how current and emerging technologies might align with the generative biological states of black spiritualities in order to concretely disrupt and dismantle oppressive societal structures real world advice on how to be invisible online from the fbi s most wanted hacker wired be online without leaving a trace your
