QST

1915

the impossibility of testing the depth hypothesis of 1960 of a connection between the complexities of grammar and a limited human temporary memory led to questioning the ancient grammatical foundations of linguistics and to developing standard hard science foundations this volume is the first detailed report on how to reconstitute linguistics on the new hard science foundation laid by victor h yngve in 1996 hard science human linguistics is the scientific study of how people communicate it studies people and also communicative energy flow and other relevant parts of the physical environment it studies the real world not the world of language and it develops theories testable against real world evidence as is standard in the hard sciences hard science linguistics takes its rightful place connecting the humanities and social sciences to biology chemistry and physics thus linguistics becomes a natural science and contributes to the unity of science this unity is clearly evident in the research reported here by these fifteen pioneering authors from diverse areas as they work to reconstitute linguistics as a true hard science

Electronic Engineering

1946-03

satellites are increasingly used for global communications as well as for radio and television transmissions with the growth of mobile communications and of digital technology the use of satellite systems is set to expand substantially and already all students of electronics or communications engineering must study the subject this book steers a middle path between offering a basic understanding of the process of communication by satellite and the methodology used and the extensive mathematical analysis normally adopted in similar texts it presents the basic concepts using as much mathematical content as is necessary to make the process understandable the principles introduced are backed up by examples of actual applications showing how professional systems engineers have achieved the required system performance capabilities the practical systems chosen are representative of modern day applications and comprise an international communications system an international maritime system and a regional system

Numerical Analysis of Stiffened Shells of Revolution. Volume 5: Engineer's Program Manual for STARS-2B-shell Theory Automated for Rotational Structures-2 (buckling), Digital Computer Program

1973

provides an up to date single source reference for all aspects of the gear industry presents an integrated approach to gear design and manufacture includes new coverage of direct gear design and ready to use gear design contains coverage of finite element analysis gear vibration load ratings and gear failures

Radio

1940

the sch mezareph or ash metzareph is only known to persons of western culture from the latin translation found in a fragmentary condition in the work entitled kabalah denudata by knorr von rosenroth published at sulzbach in 1677 84 these volumes have as a sub title the transcendental metaphysical and theological doctrines of the hebrews and they enshrine a latin translation with part of the hebrew text and commentaries of the great sohar or zohar the book of splendour which is the most famous of all the hebrew mystical codices of the kabalah sapere aude
