this book describes not rules of law but rules about law the tools that lawyers use to lawyer a law school education is more one of learning about the law than learning the law no one person can know all the law but most can learn the tools that lawyers and judges use to analyze interpret and apply a law any law knowledge of the rules about law distinguishes the way a lawyer approaches a problem from the way a layman would approach that problem a law student or paralegal needs a foundation of knowledge about the legal method the tools that are used regardless of what area of law is involved the object of this work is to show how judges and lawyers well judge and lawyer more specifically it covers the intrinsic and extrinsic guides to statutory construction the guides for analysis and use of case law and the intrinsic and extrinsic guides to contract interpretation its primary purpose is to explain the fundamental method of analysis of any legal issue by discussing the tools for extracting meaning from legal texts about the author the author practiced law for over 35 years during his tenure as counsel with a major financial services corporation he was responsible for its law department s paralegals and paralegal development program those duties led him to develop the three foundation courses that are now available in book and digital form legal logic legal method and legal promise

The Penguin Guide to the Law 1985

until now there has been no summary or overview of the wide range of work contributing to critical legal studies the movement that has aroused such a furor in the communities of law and political philosophy this book outlines and evaluates the principal strands of critical legal studies and achieves much more as well a good deal of the writing in critical legal studies has been devoted to laying bare the contradictions in liberal thought there have

been attacks and counterattacks on the liberal position and on the more conservative law and economics position now mark kelman demonstrates that any critique of law and economics is inextricably tied to a broader critique of liberalism there are three central contradictions in liberal thought between a commitment to mechanically applicable rules and to standards that fluctuate with situations between intrinsic individual values and the objective knowledge of ethical truths and between free will and determinism kelman shows us the pervasiveness of these contradictions in legal doctrine their connection to broader political theory and to visions of human nature and finally the degree to which mainstream thought tends to privilege certain of these commitments over others the author also analyzes two of the most significant components of jurisprudence today the law and economics discipline and the legal process school he concludes with a lively discussion of the role of law generally and of cognitive legitimation or the ways in which legal thought can make the unnecessary the contingent and the unjust seem natural inevitable and fair
