

Reading free Introduction to aviation insurance and risk management (Download Only)

the third edition of introduction to aviation insurance and risk management has provided the opportunity to improve the book and extend its life into the 21st century old material has been deleted and newer more timely material added unlike the previous editions a number of industry professionals have contributed to the new version despite these changes the primary purpose of the book remains the same to introduce the basic principles of insurance and risk with their special application to the aviation industry it has been designed for several similar yet distinct audiences the college student corporate pilots or fixed base operators and individuals in the insurance business this volume introduces the basic principles of insurance and risk as applied to the aviation industry it discusses aviation insurance in the united states and includes coverage of underwriting and pricing risk management premises liability and workers compensation sample policies are shown the third edition of this highly regarded work examines all forms of aviation insurance including a detailed analysis of its practical applications and of the workings of the aviation insurance market as well as including the laua lloyd s aviation underwriters association forms it has also been updated and expanded and covers a wide variety of topics including compulsory insurance the forms and contents of the policy loss of licence insurance and persons entitled to cover this readily accessible text will be of significant value to all with a business interest in this subject aircraft insurance fundamentals a concise guide for aircraft owners and operators by tim bonnell jr is a practical reference for navigating the world of aircraft insurance readers will learn why aircraft insurance is unique from other areas of insurance what affects aircraft insurance rates how to read an aircraft insurance policy and how an aircraft insurance underwriter determines premiums after reading this book the reader will understand how to know what is and what isn t covered on an aircraft insurance policy the fifth edition of this highly regarded work examines all forms of aviation insurance and includes a detailed analysis of its practical applications and of the workings of the international aviation insurance market the fourth edition of this highly regarded work examines all forms of aviation insurance and includes a detailed analysis of its practical applications and of the workings of the international aviation insurance market fully updated to include all new developments in the area of aviation insurance practice and law since the previous edition this essential work includes detailed coverage of the impact of the september 11 2001 terrorism acts on the writing of war and terrorism insurance the establishment of the aviation insurance clauses group as a replacement for the joint technical and clauses committee discussion of new policy forms clauses and endorsements adopted by the insurance market since 2000 including such endorsements as avn67c and avn99 covering the interests of aircraft financiers and lessors changes in the structure and regulation of lloyd s developments in law governing insurance companies and underwriters at lloyd s and in the interpretation of aviation policies developments in european union law which impact on the london market the only text of its kind that describes in complete detail the structure and workings of the london aviation insurance market the writing of aviation insurance the kinds of coverage which are available including hovercraft and spacecraft insurance and the legal principles involved in the interpretation of aviation insurance policies this readily accessible text will be of significant value to all with a business or legal interest in this subject the value of aircraft is increasing and their price rising passenger numbers and freight tonnage are increasing as is the complexity of liability when something goes wrong the many international organisations involved in any claim add to the difficulties but peter viccars has managed to produce a book that the layman can understand essential reading for the industry this book explores the central problems underlying the insurance of aviation war and terrorism risks and associated perils it critically analyses the reasons why conventional insurance markets are unwilling or unable to provide sustainable insurance coverage for aviation war and terrorism risks in the aftermath of catastrophic events such as the terrorist events of september 11 2001 it also examines some of the prominent concepts proposed and or implemented after 9 11 to determine whether and to what extent these concepts avoid identified pitfalls like many of life s essentials the importance of insurance is most evident when it is not available the sheer scale and magnitude of the insurance losses that followed 9 11 caused conventional insurance markets which hitherto had been offering generous insurance coverage for aviation war and terrorism risks to air transport operators for little or no premium to withdraw coverage forthwith the ensuing absence or insufficiency of commercial insurance coverage for aviation war and terrorism risks has sparked a global search

for viable and sustainable alternatives ten years have since elapsed and despite numerous efforts the fundamental problems remain unresolved the book proceeds on the premise that the underlying issues are not entirely legal in nature they have immense economic psychological and policy implications that cannot be underestimated a multidisciplinary approach is therefore used in examining the issues drawing heavily upon analytical principles adapted from law and economics and behavioural law and economics it is hoped that the resulting study will be beneficial not only to lawyers and those interested in aviation insurance but also to economists air transport insurance program managers capital market investors and governmental policymakers both at the national and international levels aircraft insurance fundamentals a concise guide for aircraft owners and operators revised and expanded 2nd edition by timothy k bonnell jr is a practical reference for navigating the world of aircraft insurance readers will learn why aircraft insurance is unique from other areas of insurance what affects aircraft insurance rates how to read an aircraft insurance policy and how an aircraft insurance underwriter determines premiums after reading this book readers will have a general understanding of what is and isn't covered by an aircraft insurance policy this revised and expanded edition includes comprehensive insights into insuring unmanned aerial systems uas or drones as well as the rapidly advancing sectors of advanced air mobility aam and electronic vertical take off and landing evtol aircraft this edition not only revises existing content but also introduces crucial new sections designed to equip readers with the knowledge to navigate the complexities of modern aviation insurance a substantial proportion of all domestic aviation accidents and fatalities that occur each year involve general aviation ga which includes all aviation except commercial and military under federal law the secretary of transportation is responsible for ensuring that commercial air carriers carry liability insurance however no such federal requirements exist for ga aircraft owners in some cases accidents involving uninsured or underinsured ga aircraft owners have occurred where individuals passengers or third parties who incurred losses received little or no compensation this book examines existing liability insurance requirements for ga aircraft owners premiums for ga liability insurance and factors that selected stakeholders cited which should be considered in determining whether to adopt a federal liability insurance requirement furthermore this book discusses the characteristics of and trends in general aviation accidents from 1999 through 2011 and recent actions taken by the federal aviation administration faa to improve general aviation safety
