## **global dynamics of small data solutions to the derivative Oct 18 2023**

in this paper we consider the derivative nonlinear schrödinger dnls equation while the existence theory has been intensely studied properties like dispersive estimates for the solutions have not yet been investigated here we address this question for the problem with small and localized data and show that a dispersive estimate for the solution holds globally in time for the proof of

## ***a new approach based on system solutions for passivity Sep 17 2023***

firstly a novel sufficient condition composing several simple linear scalar inequalities is given to guarantee the passivity of dtmbnns with unbounded time varying delays the obtained sufficient passivity condition is based on system solutions and the proposed system solutions based approach can reduce computational complexity and workload
