E.D. Report 1944

since the beginning of social life human societies have faced the problem how to distribute the results of collaborative activities among the participants the solutions they found ranged from egalitarian to unequal but caused more dissension and conflict than just about any other social structure in human history social inequality also dominated the agenda of the new field of sociology in the 19th century the theories developed during that time still inform academic and public debates and inequality continues to be the subject of much current controversy origins of inequality begins with a critical assessment of classical explanations of inequality in the social sciences and the political and economic environment in which they arose the book then offers a new theory of the evolution of distributive structures in human societies it examines the interaction of chance intent and unforeseen consequences in the emergence of social inequality traces its irregular historical path in different societies and analyses processes of social control which consolidated inequality even when it was costly or harmful for most participants because the evolution of distributive structures is an open process the book also explores issues of distributive justice and options for greater equality in modern societies along with its focus on

social inequality the book covers topics in cultural evolution social and economic history and social theory this book will appeal to scholars and advanced students of sociology economics and anthropology in particular sociological theory and social inequality

Two Oxen Ahead 2014-01-22

maize is one of five major crops grown in the uplands of thailand along with rice cassava sugar cane and rubber trees government promoted crop diversification increased population growth improved transportation networks inter national trade expansion of upland farming areas and increased demand for grains from the domestic livestock and poultry industry stimulated thailand s maize production beginning in the 1980s however thailand s domestic maize supply is currently not sufficient to meet the needs of its in country demands and small quantities have to be imported this study characterized the social and biophysical maize production environment of thailand examined its response to increasing maize demand determined constraints to future productivity growth indicated the potential environmental consequences and examined the options available for promoting sustainable growth in maize production
