Behavioral Family Intervention 1993

early intervention is the single most important advance in mental health care in recent decades representing a key shift in both theoretical standpoint and service delivery early intervention in psychiatry clearly describes best practice for extending this approach to all psychiatric disorders beginning with the rationale for it informs interventions in people from all age groups across the lifespan from perinatal to old age it addresses it in specific settings such as primary health care community health the general hospital non government agencies and in social movements and for specific disorders including depression and anxiety alcohol and substance use childhood disorders psychoses bipolar disorders eating disorders and borderline personality disorders early intervention in psychiatry is an essential guide for all psychiatrists general practitioners family physicians and public health doctors it is also a valuable resource for mental health professionals and primary care colleagues including nurses social workers psychologists occupational therapists vocational rehabilitation specialists peer and support workers and for mental health commissioners and policy makers

Enhancing the Well-being of Children and Families through Effective Interventions **2006-01-30**

children at the center of high conflict divorce and or child protection cases face increased risks to both current and future health and adjustment there is a growing research base regarding these risks and the coping abilities that children need for successful adjustment but training gaps and poorly structured services continue to be serious problems the specific characteristics of these families and risks faced by these children underscore the importance of treatment psychoeducation and other services adapted to this population evidence informed interventions for court involved families provides a critical research informed analysis of the core factors to include when developing child centered approaches to therapy and other family interventions both in a formal treatment setting and promoting healthy engagement with the other systems and activities critical to children's daily lives this book addresses common problems obstacles and the backdrop of support from other professionals or the court which may be necessary for successful intervention an international team of renowned authors provide chapters

covering a variety of service models and draw on a wide range of relevant research addressing the legal context central issues for treatment and other services and specialized issues such as trauma family violence parent child contact problems and children with special needs the book assembles in one place the best of what is known about intervention for court involved families along with practical guidance for using relevant research understanding its limitations and matching service plans to families needs it will be an essential resource for all mental health professionals evaluating or providing services to these families and to the lawyers and judges seeking a better understanding of what works for these families

Family Interventions in Domestic Violence **2006-09-26**

integrative research based multisystemic these words reflect not only the state of family therapy but the nature of this comprehensive handbook as well the contributors all well recognized names who have contributed extensively to the field accept and embrace the tensions that emerge when integrating theoretical perspectives and science in clinical settings to document the current evolution of couples and family therapy practice and research each individual chapter contribution is organized around a central theme that the integration of theory clinical wisdom and practical and meaningful research produce the best understanding of couple and family relationships and the best treatment options the handbook contains five parts part i describes the history of the field and its current core theoretical constructs part ii analyzes the theories that form the foundation of couple and family therapy chosen because they best represent the broad range of schools of practice in the field part iii provides the best examples of approaches that illustrate how clinical models can be theoretically integrative evidence based and clinically responsive part iv summarizes evidence and provides useful findings relevant for research and practice part v looks at the application of couple and family interventions that are based on emerging clinical needs such as divorce and working in medical settings handbook of family therapy illuminates the threads that are common to family therapies and gives voice to the range of perspectives that are possible practitioners researchers and students need to have this handbook on their shelves both to help look back on our past and to usher in the next evolution in family therapy

Advances in School-based Mental Health Interventions 2004

includes drug abuse prevention through family based interventions future research familial factors and substance abuse implications for prevention family focused substance abuse sa prevention what has been learned from other fields scientific findings from family prevention intervention research a universal intervention for the prevention of sa preparing for the drug free years selective prevention interventions the strengthening families program parental monitoring and the prevention of problem behavior a conceptual and empirical reformulation and family measures in sa prevention research

Early Intervention in Psychiatry **2014-11-17**

handbook of interventions that work with children and adolescents considers evidence based practice to assess the developmental issues aetiology epidemiology assessment treatment and prevention of child and adolescent psychopathology world leading contributors provide overviews of empirically validated intervention and prevention initiatives arranged in three parts part i lays theoretical foundations of treatments that work with children and adolescents part ii presents the evidence base for the treatment of a host of behaviour problems whilst part iii contains exciting prevention programs that attempt to intervene with several child and adolescent problems before they become disorders this handbook presents encouraging evidence that we can intervene successfully at the psychosocial level with children and adolescents who already have major psychiatric disorders and as importantly that we can even prevent some of these disorders from occurring in the first place

Evidence-Informed Interventions for Court-Involved Families 2019-03-19

social work practice in health care requires that practitioners be prepared to meet the interdisciplinary and managed care demands for best practices in efficacious time limited and culturally competent interventions with populations across the lifespan this text is designed to meet that demand for evidence based practice the result of

extensive systematic reviews evidence based interventions for social work in health care provides substantive in depth knowledge of empirically based interventions specifically for major and emerging medical diseases and health conditions particularly affecting diverse at risk and marginalized populations it outlines best practices for the psychosocial problems associated with the emerging chronic and major health conditions of the twenty first century such as paediatric asthma type i and type ii diabetes obesity paediatric cancer and adult hypertension the interventions discussed are detailed in terms of for whom by whom when under what circumstances for what duration and for what level client system the intervention has proven most effective this invaluable text is suitable for students and will be a useful reference for practitioners specialising in social work in health settings

Handbook of Family Therapy 2015-12-07

the first volume to showcase science based interventions that have been demonstrated effective in promoting attachment security this is a vital reference and clinical guide for practitioners with a major focus on strengthening caregiving relationships in early childhood the handbook also encompasses interventions for school age children at risk adolescents and couples with an emphasis on father involvement in parenting a consistent theme is working with children and parents who have been exposed to trauma and other adverse circumstances leading authorities describe how their respective approaches are informed by attachment theory and research how sessions are structured and conducted special techniques used such as video feedback the empirical evidence base for the approach and training requirements many chapters include illustrative case material

Drug Abuse Prevention Through Family Interventions 2001-02-01

what is mentalization how can this concept be applied to clinical work with children young people and families what will help therapists working with children and families to keep the mind in mind why does it matter if a parent can see themselves from the outside and their child from the inside minding the child considers the implications of the concept of mentalization for a range of therapeutic interventions with children and families mentalization and the empirical research which has supported it now plays a significant role

in a range of psychotherapies for adults in this book we see how these rich ideas about the development of the self and interpersonal relatedness can help to foster the emotional well being of children and young people in clinical practice and a range of other settings with contributions from a range of international experts the three main sections of the book explore the concept of mentalization from a theoretical and research perspective the value of mentalization based interventions within child mental health services the application of mentalizing ideas to work in community settings minding the child will be of particular interest to clinicians and those working therapeutically with children and families but it will also be of interest to academics and students interested in child and adolescent mental health developmental psychology and the study of social cognition

Handbook of Interventions that Work with Children and Adolescents 2004-01-09

suicide is a highly complex and multifaceted phenomenon with many contributing and facilitating factors and variables however given its being one of the most severe human behaviors an obvious focus would be to identify the underlying psychological mechanisms and processes that may lead to suicidal ideation and behavior this ebook is dedicated to studies exploring various approaches to the psychology of suicidal behavior as well as of non suicidal self injury nssi the purpose of this ebook is to shed light on in depth examinations of the current knowledge and empirical data regarding models theories and specific dimensions and variables that may help us increase the psychological understanding of suicidal phenomena the specific goal is to identify particular psychological characteristics that may be used to develop prevention and intervention methods and programs we believe that this ebook can contribute to the understanding of this behavior and help to develop specific tools therapeutic guidelines and programs that may help reduce the number of suicides occurring annually this ebook is dedicated to our dearest friend dafni assaf who was one of the greatest leaders of the suicide prevention program in israel
