how can you make multivendor services work smoothly on today s complex networks this practical book shows you how to deploy a large portfolio of multivendor multiprotocol label switching mpls services on networks down to the configuration level

you'll learn where Juniper Network's Junos, Cisco's IOS XR, and OpenContrail interoperate and where they don't. Two network and cloud professionals from Juniper describe how MPLS technologies and applications have rapidly evolved through services and architectures such as Ethernet VPNs, network function virtualization, seamless MPLS egress protection, external path computation, and more. This book contains no vendor bias or corporate messages, just solid information on how to get a multivendor network to function optimally. Topics include: Introduction to MPLS and software-defined networking (SDN); The four MPLS builders: LDP, RSVP-TE, IGP, Spring, and BGP; Layer 3 unicast and multicast MPLS services; Layer 2 VPN, VPLS, and Ethernet VPN; Inter-domain MPLS services; Underlay and overlay architectures; Data centers, NVO, and NFV; Centralized traffic engineering and TE bandwidth reservations; Scaling MPLS transport and services transit; Fast restoration based on the IGP and RSVP-TE; FIB optimization and egress service for fast restoration.

Journal of Rehabilitation Research & Development 2006

This book aims at addressing the challenges of contemporary manufacturing in industry 4.0 environment and future manufacturing aka industry 5.0 by implementing soft computing as one of the major sub-fields of artificial intelligence. It contributes to development and application of the soft computing systems including links to hardware, software, and enterprise systems in resolving modern manufacturing issues in complex, highly dynamic, and globalized industrial circumstances. It embraces heterogeneous complementary aspects such as control, monitoring, and modeling of different manufacturing tasks including intelligent robotic systems and processes addressed by various machine learning and fuzzy techniques; modeling and parametric optimization of advanced conventional and non-conventional eco-friendly manufacturing processes by using machine learning and evolutionary computing techniques; cybersecurity framework for internet of things based systems; addressing trustworthiness and resilience in machine-to-machine and human-machine collaboration; static and dynamic digital twins; integration and synchronization in a smart factory environment; step-NC technology for a smart machine vision system; and integration of open CNC with service-oriented architecture for step-NC monitoring system. In a smart manufacturing area of interest include but are not limited to applications of soft computing to address the following: dynamic process system modeling and simulation; dynamic process system parametric optimization; dynamic planning and scheduling; smart predictive maintenance; intelligent and autonomous systems; improved machine cognition; effective digital twins; integration; human-machine collaboration; robots and cobots.

Journal of Rehabilitation Research and Development 2006

This book constitutes the thoroughly refereed post-proceedings of the Third International Workshop on Machine Learning for Multimodal Interaction (MLMI 2006) held in Bethesda, MD, USA, in May 2006. The papers are organized in topical sections on: multimodal processing; image and video processing; HCI and applications; discourse and dialogue; speech and audio processing; and NIST Meeting Recognition Evaluation.

major changes in gas turbine design especially in the design and complexity of engine control systems have led to the need for an up to date systems oriented treatment of gas turbine propulsion pulling together all of the systems and subsystems

associated with gas turbine engines in aircraft and marine applications gas turbine propulsion systems discusses the latest developments in the field chapters include aircraft engine systems functional overview marine propulsion systems fuel control and power management systems engine lubrication and scavenging systems nacelle and ancillary systems engine certification unique engine systems and future developments in gas turbine propulsion systems the authors also present examples of specific engines and applications written from a wholly practical perspective by two authors with long careers in the gas turbine fuel systems industries gas turbine propulsion systems provides an excellent resource for project and program managers in the gas turbine engine community the aircraft oem community and tier 1 equipment suppliers in europe and the united states it also offers a useful reference for students and researchers in aerospace engineering

the market demands for skills knowledge and personalities have positioned robotics as an important field in both engineering and science to meet these challenging demands robotics has already seen its success in automating many industrial tasks in factories and a new era will come for us to see a greater success of robotics in industrial environments in anticipating a wider deployment of intelligent and autonomous robots for tasks such as manufacturing eldercare homecare education search and rescue de-mining surveillance exploration and security missions it is necessary for us to push the frontier of robotics into a new dimension in which motion and intelligence play equally important roles after the success of the inaugural conference the purpose of the second international conference on intelligent robotics and applications was to provide a venue where researchers scientists engineers and practitioners throughout the world could come together to present and discuss the latest achievement future challenges and exciting applications of intelligent and autonomous robots in particular the emphasis of this year's conference was on robot intelligence for achieving digital manufacturing and intelligent automations this volume of Springer's lecture notes in artificial intelligence and lecture notes in computer science contains accepted papers presented at icira 2009 held in Singapore December 16-18 2009 on the basis of the reviews and recommendations by the international program committee members we decided to accept 128 papers having technical novelty out of 173 submissions received from different parts of the world
