 accident reconstruction utilizes principles of physics and empirical data to analyze the
 physical electronic video audio and testimonial evidence from a crash to determine how and
 why the crash occurred how the crash could have been avoided or to determine whose
 description of the crash is most accurate this process draws together aspects of mathematics
 physics engineering materials science human factors and psychology and combines
 analytical models with empirical test data different types of crashes produce different types
 of evidence and call for different analysis methods still the basic philosophical approach of
 the reconstructionist is the same from crash type to crash type as are the physical principles
 that are brought to bear on the analysis this book covers a basic approach to accident
 reconstruction including the underlying physical principles that are used then details how this
 approach and the principles are applied when reconstructing motorcycle crashes this second
 edition of motorcycle accident reconstruction presents a thorough systematic and scientific
 overview of the available methods for reconstructing motorcycle crashes this new edition
 contains additional theoretical models examples case studies and test data an updated
 bibliography incorporating the newest studies in the field expanded coverage of the braking
 capabilities of motorcyclists updated refined and expanded discussion of the decelerations of
 motorcycles sliding on the ground a thoroughly rewritten and expanded discussion of
 motorcycle impacts with passenger vehicles updated coefficients of restitution for collisions
 between motorcycles and cars a new and expanded discussion of using passenger car edr
 data in motorcycle accident reconstruction a new section covering recently published
 research on post collision frozen speedometer readings on motorcycles a new section on
 motorcycle interactions with potholes roadway deterioration and debris and expanded
 coverage of motorcycle falls this second edition of motorcycle accident reconstruction is a
 must have title for accident reconstructionists forensic engineers and all interested in
 understanding why and how motorcycle crashes occur american motorcyclist magazine the
 official journal of the american motorcyclist associaton tells the stories of the people who
 make motorcycling the sport that it is it s available monthly to ama members become a part
