is a country of many cultures and all of these cultures have played important roles in establishing the country's foundation in multiculturalism in Canada. Readers explore Canada's rich cultural landscape and learn about the impact that different cultural groups have had throughout Canada's history and continue to have today. First published in 2000, several researchers have found that self-esteem is definitely not the cure-all solution to our social ills. On the contrary, promoting self-esteem may produce negative consequences. Excessive promotion of the self may be the basis for various forms of discrimination in our modern multicultural society. It takes others to know the self and the self needs others to succeed in life. Self-esteem is incomplete without other esteem. Other esteem is a creative, unique, and unconventional response to our society's apparent obsession with promoting the self. The book is unique in that it is a direct challenge to the widespread belief that low self-esteem is at the root of all social ills. It describes the importance of respect, tolerance, group effort, and connection with others to the health of the individual and gives concrete steps for individuals to take action by consciously changing their own attitudes. Other esteem will become essential reading for multicultural relations courses and any seminar where self-esteem is taught. It will also be useful in many other courses in counseling, human development, and student affairs and leadership. The book aptly describes, explores, and hits the core of very complex issues around race, racism, culture difference, dual identity, stereotypes, immigration, and alienation. It is also very thought-provoking, raising questions about one's own ability to work more flexibly in the consulting room with clients of different backgrounds. It is excellent for a directory of resources useful for training purposes and an enabling role model for good practice in counselling in a multicultural society. I enjoyed it. It should be a required handbook on the shelf of every caring professional working within a multicultural environment or setting transformations. The PCSR Journal. This book examines the many complexities of this work, is concerned with the educational implications of a cultural diversity and the role of schools and other educational institutions in combating prejudice. It proposes a multi-layered approach to education for democratic citizenship within a context of cultural pluralism during a field
