Public Education 2021 in trump white evangelical christians and american politics political scientists anand edward sokhey and paul a djupe bring together a wide range of scholars and writers to examine the relationship between former president donald trump and white american evangelical christians they argue that while this relationship which saw evangelicals supporting a famously unfaithful materialistic and irreligious candidate despite self defining in opposition to these characteristics prompted many to wonder if trump himself transformed american evangelical religion in politics this alliance reflected both change and the outcome of dynamics that were in place or building for decades contributors contextualize the trump presidency within the story of religious demographic change the growth of politicized religion nationalistic religious expression and the ways religion and politics in the united states are enmeshed in the politics of race these investigations find that the idea of religious transformation is not accurate instead the years 2015 to 2022 saw mainly minor changes to the ways religion appeared in public life but these changes ultimately complemented and advanced an existing white evangelical strategy to increase political and social power as they became a demographic minority in the united states taken together this collection reveals new insights for readers seeking to understand the religious dimensions of trump s rise the reasons evangelicals become political activists and the multifaceted alliances between secular politicians and conservative religious subcultures contributors abraham barranca ruth braunstein ryan p burge david e campbell jeremiah j castle paul a djupe john c green sarah heise geoffrey c layman andrew r lewis gerardo martí eric l mcdaniel napp nazworth shayla f olson enrique quezada llanes kaylynn sims anand edward sokhey hilde løvdal stephens kyla k stepp allan tellis

New World History and Geography 1998 this book explores representations of child autonomy and self governance in children s literature the idea of child rule and child realms is central to children s literature and childhood is frequently represented as a state of being with children seen as aliens in need of passports to adultland and vice versa in a sense all children s literature depends on the idea that children are different separate and in command of their own imaginative spaces and places although the idea of child rule is a persistent theme in discussions of children s literature or about children and childhood the metaphor itself has never been properly unpacked with critical reference to examples from those many texts that are contingent on the authority and or power of children child governance and autonomy can be seen as natural or perverse it can be displayed as a threat or as a promise accordingly the child rule motif can be seen in robinsonades and horror films in philosophical treatises and in series fiction the representations of self ruling children are manifold and ambivalent and range from the idyllic to the nightmarish contributors to this volume visit a range of texts in which children are in various ways empowered discussing whether childhood itself may be thought of as a nationality and what that may imply this collection shows how representations of child governance have been used for different ideological aesthetic and pedagogical reasons and will appeal to scholars of children s literature childhood studies and cultural studies
