The Arab-Israeli Conflict, Volume IV, Part I 2016-04-19 this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different

topics the first topic deals with the targetting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace the second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Queer Conflict Research 2024-02-19 when thinking about relations between europe and russia international relations scholars focus on why conflict has replaced cooperation the geostrategic debate excludes the possible coexistence of cooperation and conflict tracking the evolution of conflict and cooperation patterns in three zones of contact estonia kaliningrad and moldova between 1991 and 2016 this edited volume argues that although the standard narrative remains compelling local patterns of cooperation and conflict are partly autonomous

from the geostrategic level to account for the coexistence of cooperation and conflict the first chapter elaborates a theoretical proposition distinguishing fluid rigid and disputed symbolic boundaries which have different impacts on the ground the subsequent chapters address distinct dimensions of euro russian relations paying attention to local reality in estonia moldova ukraine or kaliningrad different sectors from energy to peoples movement and across institutional contexts such as the eu and nato they confirm that the standard narrative holds in most cases but also that euro russian relations vary in crucial ways according to the interests and representations of actors immersed in specific geopolitical fields despite a deterioration of geostrategic relations between europe and russia since the end of the soviet union cooperation and conflict between europe and russia explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions the chapters in this book were originally published as a special issue of the journal east european politics
