Handbook of Integrative Developmental Science

2020-03-20

although integrative conceptions of development have been gaining increasing interest there have been few attempts to bring together the various threads of this emerging trend the handbook of integrative developmental science seeks ways to bring together classic and contemporary theory and research in developmental psychology with an eye toward building increasingly integrated theoretical and empirical frameworks it does so in the form of a festschrift for kurt fischer whose life and work have both inspired and exemplified integrative approaches to development building upon and inspired by the comprehensive scope of fischer s dynamic skill theory this book examines what an integrated theory of psychological development might look like bringing together the work of prominent integrative thinkers the volume begins with an examination of philosophical presuppositions of integrative approaches to development it then shows how dynamic skill theory provides an example of an integrative model of development after examining the question of the nature of integrative developmental methodology the volume examines the nature of developmental change processes as well as pathways and processes in the development of psychological structures both within and between psychological domains the team of expert contributors cover a range of psychological domains including the macro and micro development of thought feeling motivation self intersubjectivity social relations personality and other integrative processes it ends with a set of prescriptions for the further elaboration of integrative developmental theory and a tribute to kurt fischer and his influence on developmental psychology this book will be essential reading for graduate students and researchers of developmental psychology and human development specifically developmental science

Life Span Human Development

Positive Psychology in SLA

2016-04-20

this is a text that is long overdue i am excited to see such talented and experienced counselors come together to write such an informative updated text on counseling today s adolescents jennifer jordan winthrop university counseling adolescents competently is a comprehensive text for students and professionals compiling foundational and emerging skills in the counseling field authors lee underwood and frances dailey review extensive interventions ranging from assessment to diagnosis as well as fresh perspectives on working with this often challenging group employing clinical case scenarios and profiles that demonstrate key issues this book helps the counselor in training to understand the relevant theories and research around adolescents to better engage in culturally relevant interventions and treatment planning

Counseling Adolescents Competently

2016-03-31

choice recommended read this thoroughly revised new edition updates sheila greene s original transformative account of the psychological development of girls and

women and the central role of time in shaping human experience greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women s lives as fixed and determined by their nature or their past these theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency the result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history updated for a new generation of readers the psychological development of girls and women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women s studies

The Psychological Development of Girls and Women

2014-11-27

adolescents are often an overlooked clinical population among school based practitioners there is a natural inclination to focus the delivery of mental health services assessment measures and intervention plans on younger children and there is a strong research base to support these programs on the other hand the waiting rooms of most practitioners in private practice are filled with young and middle age adults couples or families with young children because most therapists do not specialize in working with teens who might make up only a small portion of their overall caseload there is a need for high quality easily implemented activities to help engage with adolescent clients this book provides an overview of the principles of therapeutic storytelling developmental issues of adolescents and young adulthood and their strengths based model before moving into a series of chapters devoted to specific issues commonly encountered topics such as sexuality parent peer relationships substance abuse violence gangs bereavement and cultural and religious issues are covered within the chapters includes a convenient companion website designed to facilitate ease of use for the busy professional or academic contains printable storytelling and activity worksheets color photographs for phototherapy and guided imagery and additional resources website links

Therapeutic Storytelling for Adolescents and Young Adults

2013-10-24
