is a coursebook designed to access the law of environmental protection through a taxonomic approach exploring the range of legal structures and legal methodologies of the field rather than simply designing it according to air water toxics etc as subject media which often results in duplicative legal coverage all the major subject areas of pollution and resource conservation are covered but they are covered according to the legal approaches they represent the book is saxist because it originally arose and continues to carry on themes from the teaching guidance and writings of the late joseph sax the eminent pioneer of the environment law field who emphasized the interaction between common law and public law statutory structures and introduced the public trust doctrine as a thread undergirding and running through the entire field of environmental law key features includes teaching analysis of the completely revised toxics substances control act by co author robert graham esq of
