Reading and Writing to Learn 2008-04-30 in many respects zambia is an african success story from a territory whose borders were drawn with minimal attention either to the ethnic geography of the day or to natural features that combined and sometimes divided dozens of distinct ethnic

groups rose a nation with a long record of peace that has enjoyed decades of constitutional rule and even in recent years an increasingly competitive democracy perhaps most improbably the country has forged a national identity unfortunately peace constitutionalism democracy and nationhood constantly face challenges such as in the elections of 2006 when the ugly language of ethnic confrontation found renewed currency moreover zambia s economic record and prospects have been on the decline after over four decades per capita incomes are lower than they were at the dawn of independence and 95 percent of its people live on less that 2 per day despite repeated efforts to diversify the economy copper exports and foreign assistance are the main sources of the vast majority of zambia s foreign exchange earnings and most devastating at all the aids pandemic has already lowered the average life expectancy below 40 for a country one might regard as heading in the right direction zambia has a long way to go the third edition of historical dictionary of zambia through its chronology introductory essay appendixes map bibliography and hundreds of cross referenced dictionary entries on important persons places events and institutions and significant political economic social and cultural aspects provides an important reference on this african country

The Routledge Handbook of Linguistic Anthropology 2024 this work is a masterpiece already as it stands now it presents an unusually rich ethnography of a part of a community in europe s farthest arctic northeast with a focus on an extremely difficult topic to do fieldwork on the conversion of a so far hardly known group of reindeer nomads to radical evangelical baptism pentecostalism florian stammler author of reindeer

nomads meet the market culture property and globalisation at the end of the land although not working from within the subdiscipline of linguistic anthropology vallikivi foregrounds speaking and communication in his analysis of the transformation from pagan to christian he finds a complex interweaving of speaking and refraining from speaking is key to nenets personhood and demonstrates how we have to understand cultural ways of speaking in order to understand nenets baptists and pentecostals i have been reviewing book manuscripts for two decades for over a dozen presses and this is by far the most polished and impressive manuscript i have read alexander d king author of living with koryak traditions playing with culture in siberia words and silences tells the story of an extraordinary group of independent nenets reindeer herders in the northwest russian arctic under socialism these nomads managed to avoid the soviet state and its institutions of collectivization but soon after the atheist regime collapsed while some staunchly resisted many of them became fervent fundamentalist christians by exploring differing concepts of how traditional and convert nenets use and define words and of the meanings they ascribe to the withholding of speech vallikivi shows how a local form of global christianity has emerged through intricate negotiations of self sociality and cosmology moving beyond studies of modernization and globalization that have all too predictable outcomes for indigenous peoples words and silences invites us to view not only religious devotees but words themselves as agents of a complex and ongoing transformation

Hanging without a Rope 2011-01-01 this monograph explores the interface between syntax and its related components through in depth investigation of a sizable portion of the grammar of indonesian and javanese it can be read on two levels theoretically it proposes the minimalist interface thesis that syntax external linguistic interfaces are endowed with domain specific operations insertion deletion and type shifting to legitimize an otherwise non convergent result of the syntactic derivation for phonological and semantic interpretation empirically the monograph substantiates this thesis from detailed analyses of four phenomena reduplication active voice morphology p stranding under sluicing and nominal denotation the study not only contains a wealth of new insights into comparative syntax from the perspective of indonesian and javanese but also necessitates serious reconsideration of the common view of the interfaces as merely ornamental components of natural language grammar the monograph should appeal to syntacticians linguists interested in linguistic interfaces and the organization of grammar and researchers on austronesian languages

A Literary Mirror 2010-06-17 how can anthropology improve our understanding of the interrelationship between nature and culture what can anthropology contribute to practical debates which depend on particular definitions of nature such as that concerning sustainable development humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole this important book reviews the current state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans

Fantasizing the Feminine in Indonesia 2024-06-04 malaria cockfights and magic are confronting realities in the asia pacific region yet beyond these more remains unseen and misunderstood these cultures also exert an unacknowledged influence far beyond their borders inspired by one family s experience over three generations these tales are cradled in real events frailty of memory the natural passing of people and the need to protect others has rendered some into fiction central to this work is the idea that interactions with people from outside our culture challenge our expectations meanings and understandings must often be negotiated in intangible non rational and unseen ways foucault s notion of the third space has influenced this work as has the balinese belief that reality is an interaction of sekala the seen and niskala the unseen the unseen also has a political dimension here the elephant in the room choosing not to see comforted by one s own culture alone is to ignore that regional and global events are unfettered by such introspection

paradoxes are key and form a thread through the five chapters of the book addressing post disaster reconstruction from the survivors perspectives opens up space for criticism of post disaster governance without reducing the discussion of recovery to top down interventions individual histories emotions creativity and ways of being in the world the author argues inform the remaking of worlds as much as social political and cultural transformations do after the tsunami is a provocative and highly significant contribution to studies of humanitarian aid and disaster psychological anthropology narrative studies and scholarly studies of indonesia and southeast asia its elegant style pointed theorizing and moving ethnographic descriptions will draw readers into acehnese lifeworlds and politics its narratives attest to acehnese ways of living with loss within and across a history of colonial and postcolonial violence and suffering and a present of political uncertainty and hope
