experience might suggest otherwise in the abyss in revelation edward gudeman argues that even though the scenes of the underworld and its inhabitants are describing reality from the opposite perspective they declare god s sovereignty and power in an equally powerful way examining the motif and imagery of the abyss and the sea in old testament new testament greco roman and second temple jewish writings gudeman identifies traditions that john appropriates in revelation in order to create his unique vision of the abyss gudeman shows that the abyss and related concepts in revelation are variously envisioned as the abode of evil creatures the place from which they exit and a prison that holds them captive in all of this john consistently demonstrates that god is in control of the activity of satan and demonic beings and that their destruction is both planned and certain original and convincing this volume sheds light on revelation s message about how god responds to evil and advances our understanding of several interpretive problems related to the abyss and its inhabitants biblical scholars especially will benefit from gudeman s research the power of culture in city planning focuses on human diversity strengths needs and ways of living together in geographic communities the book turns attention to the anthropological definition of culture encouraging planners in both urban and cultural planning to focus on characteristics of humanity in all their variety it calls for a paradigm shift re positioning city planners base maps to start with a richer understanding of human cultures borrupt argues for cultural master plans in parallel to transportation housing parks and other specialized plans while also changing the approach of city comprehensive planning to put people or users first rather than land uses as does the dominant practice cultural plans as currently conceived are not sufficient to help cities keep pace with dizzying impacts of globalization immigration and rapidly changing cultural interests cultural planners need to up their game and enriching their own and city planners cultural competencies is only one step both planning practices mike greenberg argues that the purpose of cities and neighborhoods is to foster economic social and intellectual exchange the process that underlies the creation of value he seeks to show how the detailed geography of the city can either inhibit or encourage such exchanges and thus profoundly affect the lives of the people who live there cities filled an important evolutionary niche historically because they were the places in contrast to rural areas or villages where exchange occurred with greatest efficiency where value was created most spectacularly and thus where the wealth was but it wasn t just the fact of concentration but the how of it that made cities efficient producers of value and circulators of wealth the poetics of cities is concerned with the context of contemporary cities and suburban rings where development dynamics guided by the needs of the automobile and by reformist planning concepts that went awry create environments that are increasingly hostile to exchange and thus threaten to inhibit the economic development that made them possible in the first place the city of late nineteenth and

in this lively and insightful book mike greenberg argues that the purpose of cities and neighborhoods is to foster economic social and intellectual exchange the process that underlies the creation of value he seeks to show how the detailed geography of the city can either inhibit or encourage such exchanges and thus profoundly affect the lives of the people who live there cities filled an important evolutionary niche historically because they were the places in contrast to rural areas or villages where exchange occurred with greatest efficiency where value was created most spectacularly and thus where the wealth was but it wasn't just the fact of concentration but the how of it that made cities efficient producers of value and circulators of wealth the poetics of cities is concerned with the context of contemporary cities and suburban rings where development dynamics guided by the needs of the automobile and by reformist planning concepts that went awry create environments that are increasingly hostile to exchange and thus threaten to inhibit the economic development that made them possible in the first place the city of late nineteenth and early twentieth century america was in some ways a remarkably sophisticated technology for fostering exchange and cementing community taking examples mostly from his hometown san antonio texas greenberg examines certain features of those cities their sidewalk systems their scale and setbacks the rhythms of their streetscapes the structure of their neighborhoods and shows why they worked so well and why they cannot be arbitrarily tossed aside without doing damage to the urban economy he then offers some practical planning strategies and regulatory ideas to help cities retain what is useful from their traditional forms while at the same time accommodating modernity engagingly written the poetics of cities will make fascinating reading for architects urban planners neighborhood activists city officials real estate developers and anyone interested in the quality of urban life in america book jacket title summary field provided by blackwell north america inc all rights reserved
