throughout the pedagogical practices discussed cover three specific areas: tasks, skills, and strategies. The study focuses on text input processing for written versus spoken tasks at various levels of task performance and for language versus information. The authors discuss, among other issues, various elements of second language speech production, teachers' evaluation of communicative versus form-focused tasks, and task-based versus proficiency-based performance. As a study located in multilingual and mixed-ability classrooms, this work provides immense insights to teacher-educators and researchers working in ESL settings with learners from diverse backgrounds.

foregrounds the practical usefulness of bilingualism with specific reference to talk organisation research on bilingualism and on code switching in particular has traditionally been geared towards rehabilitating bilingualism and bilingual language use from being seen as a sign of lack of competence code switching is now seen as a sign of high competence in the languages involved however this rehabilitation of bilingualism raises an entirely new problem where to from here how can the study of bilingualism continue to be interesting and relevant in order to overcome the challenges the discipline faces as a result of its own success here joseph gafaranga argues the notion of bilingualism itself must be redefined bilingualism must be seen as consisting of diverse interactional practices and investigated as such this book details the rehabilitation effort which has been undertaken to get us where we are today proposes a methodology which can be used in moving forward and illustrates it with three case studies all the while inviting other researchers to contribute to this new research direction key features demonstrates empirically how bilingualism can be thought of as a resource drawing on data from a variety of sociolinguistic

context examines specific aspects of conversational organisation such as turn taking sequence organisation repair organisation where language choice is used as a resource investigates the role of language choice in bilingual conversation against the backdrop of clearly set out theoretical backgrounds

## **Bilingualism as Interactional Practices 2016-11-21**

this volume addresses two current gaps in pragmatics research in English as a lingua franca. Firstly, the contexts, approaches and theories of pragmatics generally that remain under-explored in studies of ELF speakers. Secondly, the paucity of ELF pragmatics studies investigating Asia despite its economic and geo-political importance and the role of English as a region-wide lingua franca. The volume draws together a range of pragmatics-related chapters contributed by leading experts in pragmatics both in English as a lingua franca and more broadly. These either present new research that extends the current state of the field or introduce approaches and theories from other areas of pragmatics that translate readily to analysis of ELF interaction. Five of the chapters are Asia-focused, examining pragmatic aspects of communication among Asian ELF users. The volume therefore offers scope for ELF pragmatics researchers to further broaden the field's theoretical and analytical horizons and adds to the quantity of knowledge about pragmatics in ELF communication in Asia. Its publication raises the visibility of this research area within the broader field of pragmatics.

this collection introduces an innovative micro analytical approach to interaction management in remote interpreting offering new insights into our understanding of the conversational dynamics of remote dialogue interpreting the book calls attention to the need for greater reflection on the impact of the increased use of remote interpreting via telephone and video link particularly in light of the covid 19 pandemic on the already complex interactional dynamics of communication in dialogue interpreting settings featuring perspectives from both established and emerging scholars the volume explores both the signals and mechanisms of interaction

management and the effects of context in such settings chapters draw on empirical studies based on experimental and authentic data from video recordings and eye tracking data to examine the impact on smoothness and synchronization of the interaction in remote interpreting in light of the absence of multimodal resources such as gaze and gesture in collecting this research in a single volume the book paves the way for further research on the changing relationships between interaction management technology and multimodality in dialogue interpreting contexts in today's increasingly technology mediated world this volume will be of interest to students and scholars in interpreting studies language and communication and pragmatics
