March 1945 allied troops are poised to cross the Rhine and sweep on into Germany victory is finally within their grasp but if they believe this victory can be easily won they face swift disillusionment the final 100 days of the Second World War will prove to be bitterly and bloodily fought village by village town by town in Victory in the West 1945 acclaimed military historian Peter Caddick Adams brings this closing stage of the Allies' fight against Nazi Germany brilliantly to life he explores the immense challenges they faced in crossing the Rhine on a 300 mile front he tells stories of individual acts of resolve and heroism of often exhausted troops pressing forward attacks in the face of ferocious resistance he recounts their shocked first encounters with the barbarities of Hitler's regime as they reached the gates of Buchenwald Belsen and Dachau and he goes behind the front line to analyse the strategic decisions made at Allied headquarters and to offer pin sharp portraits of the military leaders throughout he draws on a vast range of memoirs and personal interviews with survivors to give a vivid sense of what it was like to encounter enemy combatants and civilians face to face compulsively readable this will be the standard work on the closing days of the Second World War for a generation

victory at stalingrad tells the gripping strategic and military story of that battle the hard won soviet victory prevented hitler from waging the second world war for another ten years and set the germans on the road to defeat the soviet victory also prevented the nazis from completing the final solution the wholesale destruction of european jewry which began with hitler s war of annihilation against the soviets on the eastern front geoffrey roberts places the conflict in the context of the clash between two mighty powers their world views and their leaders he presents a great human drama highlighting the contribution made by political and military leaders on both sides he shows that the real story of the battle was the soviets failure to achieve their greatest ambition to deliver an immediate war winning knockout blow to the germans this provocative reassessment presents new evidence and challenges the myths and legends that surround both the battle and the key personalities who led and planned it

the poetics of victory in the greek west examines the relationship between epinician and the heroizing narratives about athletes or hero athlete narratives that circulated orally in sicily and italy in the late archaic and early classical period drawing on the colorful stories told about athletes in later sources the fragments of simonides and the surviving odes of pindar and

bacchylides it argues that epinician was formed in opposition to orally transmitted narratives and that these two forms epinician and the hero athlete narrative promoted opposed political visions with epinician promoting the deinomenid empire and its structures and the hero athlete narrative opposing deinomenid rule combining an intimate knowledge of the material culture of the greek west with an innovative use of available source material the poetics of victory in the greek west exposes the rich intersections between athletics and politics in sicily and italy offering a new and compelling account of deinomenid self promotion and of the varied and complex communities that operated under the deinomenids control or within their shadow further by establishing models of production and interpretation for the orally transmitted narratives and bringing them into dialogue with epinician the poetics of victory in the greek west reveals much about epinician as a form how it developed in the greek west what meanings it already carried and what meanings it accrued as it was appropriated by hieron the second deinomenid ruler
