For ICT professionals, project managers, researchers, academicians, and upper level students interested in the applications and advances in ICTs, this book provides an overview to the exam topics including a need-to-know list that identifies areas that must be understood in depth. It includes exercises that can be performed usually with a small test bed server. The book contains practice test questions that assess the reader's knowledge of the current exam topics. It serves as a complement to the classroom training provided by SAP, integrated with other modules such as MM, PP, and QM. Sales and distribution is used to handle the sales inventory control, warehousing, and back office functions. This comprehensive reference includes all major concepts related to SAP SD functionality, technical configuration, and implementation. A complete glossary of terms has been included to help the reader understand the myriad terms associated with this SAP module. The book serves as an excellent reference for both earlier and newer versions of SAP or as a comprehensive review for certification topics. Covered include invoicing, distribution points, backorder processing, account determination, material master, transaction codes, partner procedures, rebates, and refunds, interfaces, condition types, inventory issues, administration tables, and more. This edition no longer dates are given for previous ones. It focuses on the reorientation and technical foundations of business software development in the changing business framework driving applications of the R/3 system for enterprise resource planning (ERP), specifically SAP R/3 release series 4.x. Coverage includes ERP client/server computing, business processes over the internet, object technology, and system implementation and customization. Testing SAP R/3 a manager's step-by-step guide shows how to implement a disciplined, efficient, and proven approach for testing SAP R/3 correctly from the beginning of the SAP implementation through post-production support. The book also shows SAP professionals how to efficiently provide testing coverage for all SAP objects before they are moved into a production environment.
