Boomer Bust?: The boomers and their future *2009*

whatever the national trends are with regard to real estate whether they are booming or busting what really matters is what the market conditions are in your region town or neighborhood for as david lereah points out in the end all real estate is local what does that mean even during the real estate boom of 2001 2005 a great many cities and regions did not participate in the boom they lagged behind or even decreased in value similarly when prices began to fall nationally there were plenty of regions and locales where prices rose and sales boomed as lereah makes clear the most important factor in buying or selling a home isn't what is going on nationally it is what is going on in your local market evaluating present and future trends and influences in your region or neighborhood is essential to creating long term wealth whether you are in a buyer's or a seller's market and david lereah as the chief economist for the national association of realtors shows you how to determine the conditions in your neighborhood lereah reveals how to evaluate the dna of

homes in the town or county or region you are considering every town has its own real estate dna the characteristics that make a region or city more or less desirable to live in determine whether property values in your targeted neighborhood are on the rise research future real estate influences and trends from migration into or out of the region to plans to attract or develop new businesses in the area understand the local factors that can affect your investment in the future countless books offer advice on how to buy and sell a home but all real estate is local is the first book to explain how knowing the ins and outs of the local market you are targeting is essential to deciding when where and what to buy

Westward Women 2017-03-31

the aesthetics of nostalgia tv explores the aesthetic politics of nostalgia for 1950s and 60s america on contemporary television specifically it looks at how nostalgic tv production design shapes and is shaped by larger historical discourses on gender and technological change and america s perceived decline as a global power alex bevan argues that the aesthetics of nostalgic tv tell stories of their own about historical decline and progress and the place of the baby boomer television suburb in american national memory she contests theories on nostalgia that see it as stagnating regressive or

a reversion to outdated gender and racial politics and the technophobic longing for a bygone era and instead argues nostalgia is an important form of historical memory and vehicle for negotiating periods of historical transition the book addresses how and why the shows construct the boomer era as a placeholder for gender racial technological and declensionist discourses of the present the book uses mad men amc 2007 2015 ugly betty abc 2006 2010 desperate housewives abc 2004 2012 and film remakes of 1950s and 60s family sitcoms as primary case studies

Your Exit Map *2007-04-03*

because researchers often treat baby boomers of color as belonging to one group quality data on the individual status of specific racial populations is lacking leading to insufficiently designed programs policies and services the absence of data is a testament to the invisibility of baby boomers of color in society and deeply affects the practice of social work and other helping professions that require culturally sensitive approaches melvin delgado rectifies this injustice by providing a comprehensive portrait of the status and unique assets of boomers of color using specific data he grounds an understanding of boomers financial medical and emotional needs within a historical socioeconomic cultural and political context resulting in tailored recommendations for meeting the

challenges of a growing population his research focuses on african american hispanic asian pacific islander and native american older adults and addresses issues of financial security employment stability housing and health care which are often complicated by linguistic and cultural differences rather than treat baby boomers of color as a financial burden on society and its resources delgado recognizes their strengths and positive contributions to families and communities resulting in an affirming and empowering approach to service

All Real Estate Is Local 2019-02-07

the hispanic population has dramatically grown since the middle of the 20th century demographers predict that by the year 2050 one in three americans will of hispanic origin but the hispanic population is not a homogeneous group it varies by race and ethnicity culture economic status education and other important factors the purpose of the present volume is to provide information on selected topics regarding the growth distribution and size of the hispanic population the volume brings together an eclectic set of six research papers the first four examine traditional demographic topics population growth mortality and immigration the last two address topics that are not often examined among hispanics hispanic baby boomers and an interesting study

on self identification among hispanics using vital events data and census data

Baby Boomers of Color *2012-03-01*

before the drought of the early twenty first century the dry benchmark in the american plains was the dust bowl of the 1930s but in this eye opening work kevin z sweeney reveals that the dust bowl was only one cycle in a series of droughts on the u s southern plains reinterpreting our nation s nineteenth century history through paleoclimatological data and firsthand accounts of four

dry periods in the 1800s prelude to the dust bowl demonstrates the dramatic and little known role drought played in settlement migration and war on the plains stephen h long s famed military expedition coincided with the drought of the 1820s which prompted long to label the southern plains a great american desert a destination many anglo americans thought ideal for removing southeastern indian tribes to in the 1830s the second dry trend from 1854 to 1865 drove bison herds northeastward fomenting tribal warfare and deprived civil war armies in indian territory of vital commissary in the late 1880s and mid 1890s two more periods of drought triggered massive outmigration from the southern plains as well as appeals from farmers and congressmen for federal famine relief pleas quickly denied by president grover cleveland sweeney s interpretation of familiar events through the lens of drought lays the groundwork for understanding why the u s government s reaction to the dust bowl of the 1930s was such a radical departure from previous federal responses prelude to the dust bowl provides new insights into pivotal moments in the settlement of the southern plains and stands as a timely reminder that drought as part of a natural climatic cycle will continue to figure in the unfolding history of this region

Ethics and Hidden Greed *2018-02-12*

credit and debt appear to be natural permanent facets of americans lives but a debt based economy and debt financed lifestyles are actually recent inventions in 1951 diners club issued a plastic card that enabled patrons to pay for their meals at select new york city restaurants at the end of each month soon other charge cards as they were then known offered the convenience for travelers throughout the united states to pay for hotels food and entertainment on credit in the 1970s the advent of computers and the deregulation of banking created an explosion in credit card use and consumer debt with gigantic national banks and computer systems that allowed variable interest rates consumer screening mass mailings and methods to discipline slow payers with penalties and fees middle class americans experienced a sea change in their lives given the enormous profits from issuing credit banks and chain stores used aggressive marketing to reach americans experiencing such crises as divorce or unemployment to help them make ends meet or to persuade them that they could live beyond their means after banks exhausted the profits from this group of people they moved into the market for college credit cards and student loans and then into predatory lending through check cashing stores and pawnshops to the poor in 2003 americans owed nearly 8 trillion in consumer debt amounting to 130 percent of their average disposable

income the role of credit and debt in people s lives is one of the most important social and economic issues of our age brett williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most americans by propelling the social changes that are enacted when an economy is based on debt williams argues that credit and debt act to obscure reproduce and exacerbate other inequalities it is in the best interest of the banks corporations and their shareholders to keep consumer debt at high levels by targeting low income and young people who would not be eligible for credit in other businesses these companies are able quickly to gain a stranglehold on the finances of millions throughout williams provides firsthand accounts of how americans from all socioeconomic levels use credit these vignettes complement the history and technical issues of the credit industry including strategies people use to manage debt how credit functions in their lives how they understand their own indebtedness and the sometimes tragic impact of massive debt on people s lives
